

Exam : 190-701

Title : IBM Lotus Notes Domino Application  
Development Update

Ver : 11-25-08

---

**QUESTION 1:**

Joanna needs to check to see if the Administration ECL in the name and address book is locked. What function will give her this information?

- A. @GetAdminECLStatus
- B. @AdminECLIsLocked
- C. @IsAdminECLLocked
- D. @AdministrationECLStatus

Answer: B

---

**QUESTION 2:**

Mike has enabled AutoSave for a form in his Invoice.nsf Domino application. What must he do to make sure the AutoSave information does not contain outdated documents?

- A. Run compact on the AutoSave database.
- B. Nothing. Documents are removed automatically.
- C. Set the "Remove AutoSave documents older than nn days" value in Database Properties.
- D. Run compact on the Invoice.nsf Domino application.

Answer: B

---

**QUESTION 3:**

Rebecca has a number of shared actions in her Domino application, but she needs to quickly determine which actions display in the action bar and which actions display in the menu. What feature in Domino Designer can she check to find this information?

- A. The shared actions design columns for action bar and menu locations.
- B. The Location field in the Shared Action property dialog box.
- C. The Find Shared Actions button in the Action Bar design element.
- D. The Shared Action Location section of the Design Synopsis.

Answer: A

---

**QUESTION 4:**

Mark wants to use @Command([DiscoverFolders]) to check which folder(s) contain a certain document. This command does not appear to be working for him. What property should Mark check?

- A. Folder Properties - Allow Folder Discovery

- B. Database Properties - Don't Maintain Unread Marks
- C. Form Properties - Don't Maintain Unread Marks
- D. Database Properties - Allow Folder Discovery

Answer: D

---

**QUESTION 5:**

What most accurately describes a Web service?

- A. A Web service is a self-contained, self-describing, modular application, based on XML, which can be published to and invoked from the Web.
- B. A Web service is an XML agent running on a Domino server that can be called from a browser and returns information in HTML format.
- C. A Web service is a Java program in a W3C standard format that allows web-based invocation.
- D. A Web service is a LotusScript agent that can be called from a browser and returns information via XML.

Answer: A

---

**QUESTION 6:**

Scott has created a Web service in his Domino application. He would like to analyze the performance of the Web service. How would he do this?

- A. Select "Enable web service profiling" from File - Tools - Debugging Preferences.
- B. Select "Enable web service profiling" in Database Properties.
- C. Select the web service in Domino Designer and click the "Enable Profiling" button.
- D. Select "Profile This Web Service" in the Web Service Properties.

Answer: D

---

**QUESTION 7:**

Dennis needs to determine if a Notes setting cannot be changed due to policy rules. What function will give Dennis this information?

- A. @PolicyIsFieldLocked
- B. @PolicyFieldUnavailable
- C. @IsPolicyFieldLocked
- D. @GetPolicyFieldSetting

Answer: A

---

**QUESTION 8:**

Michael needs to write a formula that is based on whether a Notes setting cannot be changed due to policy rules. What is the format of the function that Michael will need to use?

- A. @IsPolicyFieldLocked(fieldname)
- B. @PolicyIsFieldLocked(fieldname)
- C. @GetPolicyFieldSetting(fieldname)
- D. @PolicyFieldUnavailable(fieldname)

Answer: B

---

**QUESTION 9:**

Jeff selected the option to disable the exit prompt when closing the Notes client. He no longer receives the exit prompt when exiting Domino Designer. Can he disable the exit prompt for the Notes client and have the exit prompt enabled for Domino Designer?

- A. No, because Domino Designer does not access the notes.ini file.
- B. No, because both the Notes Client and Domino Designer are controlled by the same setting.
- C. Yes. By default the exit prompt is enabled for the Notes client and disabled for Domino Designer. He needs to select "Prompt When Exiting Domino Designer" from File - Preferences - User Preferences.
- D. Yes, by deselecting the "Do Not Prompt When Exiting Domino Designer/Administrator" preference using File - Preferences - User Preferences menu option In Domino Designer.

Answer: B

---

**QUESTION 10:**

Bertha has a number of open Notes documents in her Notes client, and she would like to quickly close all the tabs at once. How can she do this?

- A. File - Close All Open Window Tabs
- B. File - Close Current Open
- C. Actions - Close Current Open
- D. Actions - Close All Tabs

Answer: A

---

**QUESTION 11:**

Robert wants to programmatically enter a request in the Administration Requests

database to continue a previously initiated request that is pending approval. What LotusScript method will accomplish this for Robert?

- A. NotesAdministrationProcess.ApproveHostedOrgStorageDeletion
- B. NotesView.ApproveValidPendingRequestsOnServer
- C. NotesDocument.ApprovePendingRequestOnServer
- D. NotesSession.ContinueHostedAdminRequest

Answer: A

---

**QUESTION 12:**

Sally has clicked on a view column that states that the design cannot be modified. Where can she find the definition for that column in Domino Designer?

- A. Shared Resources - Columns
- B. Views - Shared Columns
- C. Other - Shared Columns
- D. Shared Code - Columns

Answer: D

---

**QUESTION 13:**

Jose needs to modify a Domino application that has a Web service as part of the application design. Where can he find the Web service design element?

- A. Other - Web Services
- B. Shared Code - Web Services
- C. Shared Code - Agents
- D. Shared Resources - Web Services

Answer: B

---

**QUESTION 14:**

What must a developer do before the command to show a document's folder location(s) can be used?

- A. Select the Database Property for "Maintain Folder Unread Information".
- B. Ensure that there is at least one shared folder design element in the database.
- C. Select "Enable document folder tracking" from File - Preferences - Designer Preferences with Domino Designer.
- D. Ensure that at least one embedded outline has "Maintain Folder Unread Information" selected.

Answer: D

---

**QUESTION 15:**

Violet is responsible for maintaining a Domino Web service that is used extensively in her organization. She wants to make sure that any changes made to the web service that would alter the WSDL file do not get saved accidentally to the application design. What can she do to help prevent this?

- A. Select Warn If The WSDL Interface Is Modified option in the Web Service Properties dialog box.
- B. Select Do Now Allow WSDL Interface Changes option in the Web Service Properties dialog box.
- C. Select Flag WSDL Interface Changes in the Web Service Properties dialog box.
- D. Select WSDL Is Read Only option in the Web Service Properties dialog box.

Answer: A

---

**QUESTION 16:**

Tony needs to change a Shared Column formula, but he needs to know what views will be affected by this change. How can Tony determine which views use a specific Shared Column?

- A. In Domino Designer, Shared Columns - Who is using this Shared Column
- B. In Domino Designer, Tools - Find Shared Columns
- C. In Domino Designer, File - Database - Design Synopsis
- D. In Domino Designer, Design - Design Properties - Shared Column Use

Answer: A

---

**QUESTION 17:**

Russell is using Eclipse to debug a Java agent he has written in Domino Designer. When he imports the Java code into Eclipse, it will not compile. What does he need to do to correct this?

- A. Eclipse can debug the Domino agent without full compilation.
- B. Import the Notes.jar file into the Eclipse Java project.
- C. Select "Enable external debugger" in the Agent Properties before exporting the code.
- D. Add import ibm.eclipse.\* to his Java agent.

Answer: B

---

**QUESTION 18:**

Dale has written a LotusScript Web service and now needs to generate the WSDL file so it can be used on the Domino server. What does Dale need to do to generate the WSDL file?

- A. Click the "Show WSDL" action button at the top of the web service design element.
- B. Click the "Import WSDL" action button at the top of the web service design element.
- C. Click the "Export WSDL" action button at the top of the web service design element.
- D. Nothing. The WSDL file is generated automatically when the design element is saved.

Answer: D

---

**QUESTION 19:**

What is the definition of WSDL?

- A. Web service Specification and Description Language
- B. Web Services Domino Language
- C. Web Services Description Language
- D. Web Services Definition Language

Answer: C

---

**QUESTION 20:**

Paul is viewing the list of form elements in the Policy Invoice application. He moves the right edge of the Name column in the Domino Designer list to show the complete form name. How can he make sure that the width of the column retains this setting?

- A. File - Preferences - User Preferences - Retain column widths in Designer
- B. Design - Preferences - Retain column widths
- C. Domino Designer column widths are persistent between sessions.
- D. Tools - Designer - Retain column widths in Designer

Answer: C

---

**QUESTION 21:**

Brittany is designing a view in her Domino application where three columns in the view should be colored based on user preferences. Is this possible?

- A. Yes, because Domino Designer now allows multiple user-defined color columns.
- B. Yes, because she can use Shared Columns to create multiple user-defined color columns.
- C. No, because Domino Designer only allows a single user-defined color column in a

view.

D. No, because Shared Columns only allow a single user-defined color column in a view.

Answer: A

---

**QUESTION 22:**

Scott is designing a web form that will be used with screen readers for visually-impaired users. He includes a table in the form to list products, price, and availability. How can he design the table to allow the screen reader to properly interpret the information audibly?

- A. Create a style sheet with a style of "Aural" for use with screen readers.
- B. Select "Enable for screen readers" from the top row of cells in the Table Properties box.
- C. Select "Column Header" in the top row of cells in the Table Properties box.
- D. Select "Accessibility Enabled" in the Table Properties box.

Answer: C

---

**QUESTION 23:**

What port should be designated to connect the Notes agent and the debugger?

- A. Any unused port
- B. Port 1352
- C. The current http port
- D. The default port designated for the debugger

Answer: A

---

**QUESTION 24:**

Rex is looking at the list of agents in his Project Tracking application in Domino Designer. He is interested in the Trigger information for the agents. What new change will he see in Domino Designer for that information?

- A. The "Start running agent at" information is now displayed.
- B. The "Run agent every" information is now displayed.
- C. The Frequency information is now displayed in icon format.
- D. The Trigger information is now displayed in icon format.

Answer: D

---

**QUESTION 25:**

Mark wants to use @Command([DiscoverFolders]) to check which folder(s) contain a

certain document. This command does not appear to be working for him. What property should Mark check?

- A. Form Properties - Don't Maintain Unread Marks
- B. Database Properties - Allow Folder Discovery
- C. Folder Properties - Allow Folder Discovery
- D. Database Properties - Don't Maintain Unread Marks

Answer: B

---

**QUESTION 26:**

Lorraine is examining a WSDL file for her Domino Web service. What role does the Message element have in the file?

- A. It defines messages that can be displayed to the end user.
- B. It defines error messages that can be returned to the browser.
- C. It stores the actual data being sent to the Web service.
- D. It is an abstract definition of data being communicated to or from the Web service.

Answer: D

---

**QUESTION 27:**

Samantha has created a Web service to return an employee's pay rate. How can Samantha secure this Web service?

- A. Add the "username=" URL parameter when calling the Web service.
- B. Set the Access Control List to restrict access to the Domino application.
- C. She doesn't need to do anything because Web services run with default level security.
- D. Define the security requirements in the WSDL file.

Answer: B

---

**QUESTION 28:**

Brittany is designing a view in her Domino application where three columns in the view should be colored based on user preferences. Is this possible?

- A. No, because Domino Designer only allows a single user-defined color column in a view.
- B. Yes, because she can use Shared Columns to create multiple user-defined color columns.
- C. No, because Shared Columns only allow a single user-defined color column in a view.
- D. Yes, because Domino Designer now allows multiple user-defined color columns.

Answer: D

---

**QUESTION 29:**

Gail has a complex column defined in an existing view in her Domino application. She would like to use this column in four other views. How should she make this a shared column to be used in the other views?

- A. Copy the column from the existing design and paste it into the Shared Column design area in Domino Designer.
- B. Copy the column into the other views and choose Share this column in the Column Properties dialog box.
- C. Select the column and choose Create - Copy As Shared Column.
- D. Select the Share this column option in the Column Properties dialog box.

Answer: C

---

**QUESTION 30:**

Cameron has created a new LotusScript Web service design element and imported the WSDL file. What is the next step he needs to take to build the Web service?

- A. Export the WSDL file for public use.
- B. Write the code for each Web service method.
- C. Test each of the Web service methods.
- D. Specify the PortBindingType for the Web service.

Answer: B

---

**QUESTION 31:**

Julie wants to have a view action display in a custom pop-up menu when the right mouse button is clicked. How can she do this?

- A. Set the Action bar to "Include in right mouse button menu".
- B. Set the Action button to "Include in right mouse button menu".
- C. Set the view property to "Include actions in right mouse button menu".
- D. Set the database property to "Include actions in right mouse button menu".

Answer: B

---

**QUESTION 32:**

Tony has created a Shared Column to display the processing status of an order. The target views for the Shared Column do not share a common display format. Can Tony

still use a Shared Column in his views?

- A. Yes, by selecting "Use Formula Only" when adding the Shared Column to the view.
- B. No, because Shared Columns automatically use the format of the previous field column.
- C. No, because Shared Columns must all use the same format.
- D. Yes, but the column display format will not match the rest of the view.

Answer: A

---

**QUESTION 33:**

John needs to determine if his Domino application is running within the Workplace client. Which LotusScript property can be checked for this information?

- A. NotesUIWorkspace.WCTEnabled
- B. NotesUIWorkspace.IsEmbeddedInsideWCT
- C. NotesSession.IsEmbeddedInsideWCT
- D. NotesSession.WCTEnabled

Answer: B

---

**QUESTION 34:**

Charlotte is creating a Web service. What role does WSDL play in a Web service?

- A. WSDL controls the access levels of a Web service client.
- B. WSDL allows communication via HTTP between applications.
- C. WSDL executes the web service on the target Web service.
- D. WSDL defines the network services offered in a Web service.

Answer: D

---

**QUESTION 35:**

Tonya must ensure that only users with the [Administrator] role can edit the Price field on the Product form. The other fields on the form are editable by all users. How can Tonya restrict who can edit the Price field?

- A. Use an Input Enabled formula of @IsMember([Administrator];@UserRoles) on the field.
- B. Select the [Administrator] role in the form's "Who can edit fields in this document" property.
- C. Place the field in a computed subform.
- D. Use a Computed For Display field and hide when formulas to display the field value to users without the [Administrator] role.

Answer: A

---

**QUESTION 36:**

Jeff selected the option to disable the exit prompt when closing the Notes client. He no longer receives the exit prompt when exiting Domino Designer. Can he disable the exit prompt for the Notes client and have the exit prompt enabled for Domino Designer?

- A. Yes, by deselecting the "Do Not Prompt When Exiting Domino Designer/Administrator" preference using File - Preferences - User Preferences menu option In Domino Designer.
- B. No, because both the Notes Client and Domino Designer are controlled by the same setting.
- C. Yes. By default the exit prompt is enabled for the Notes client and disabled for Domino Designer. He needs to select "Prompt When Exiting Domino Designer" from File - Preferences - User Preferences.
- D. No, because Domino Designer does not access the notes.ini file.

Answer: B

---

**QUESTION 37:**

Tony has deleted a Shared Column in Domino Designer, but it was still used in a view. What will happen to that column in the view?

- A. The column will remain in the view.
- B. Domino Designer will not let you delete a Shared Column that is still being used in at least one view.
- C. The column will be deleted from the view.
- D. The column will be flagged as "hidden".

Answer: A

---

**QUESTION 38:**

Darren is examining a WSDL file for his Domino Web service. What role does the Operation element have in the file?

- A. It is the security parameters attached to the Web service.
- B. It is the parameters supported by the Web service.
- C. It is an abstract description of an action supported by the Web service.
- D. It is the access method required for the Web service.

Answer: C

---

**QUESTION 39:**

What is the definition of "binding" for a Web service?

- A. Execution parameters for the Web service
- B. A WSDL protocol and data format specification for a port type
- C. The language format of the Web service
- D. The compile options for the Web service

Answer: B

---

**QUESTION 40:**

Tony has created a Shared Column to display the processing status of an order. The target views for the Shared Column do not share a common display format. Can Tony still use a Shared Column in his views?

- A. Yes, but the column display format will not match the rest of the view.
- B. No, because Shared Columns must all use the same format.
- C. No, because Shared Columns automatically use the format of the previous field column.
- D. Yes, by selecting "Use Formula Only" when adding the Shared Column to the view.

Answer: D

---

**QUESTION 41:**

Joe would like to add a short comment to his Invoice form design to let other developers know what the form should be used for. How can Joe add this information to the form design?

- A. Add the comment information by selecting the Invoice form in the Domino Designer client and clicking in the Comment column to edit the comment.
- B. Add the comment information, by selecting Comments on the Object tab in the Programmer's pane.
- C. Add the comment information to the Comments tab in the Form Properties dialog box.
- D. Add the comment information in the \$\$Comment field in the form design.

Answer: A

---

**QUESTION 42:**

Bertha has a number of open Notes documents in her Notes client, and she would like to quickly close all the tabs at once. How can she do this?

- A. File - Close All Open Window Tabs

- B. Actions - Close All Tabs
- C. Actions - Close Current Open
- D. File - Close Current Open

Answer: A

---

**QUESTION 43:**

Shelley has written a Web service in her Domino application and would like to test the service locally. How can she do that?

- A. Open the Web Service, select Preview In Browser, and then change the URL to reference the name of the web service followed by OpenWebService or WSDL.
- B. Select Tools - Web Service - Run Agent from the Domino Designer menu, and then change the URL to append OpenWebService or WSDL.
- C. Open a form or page design, preview it in a browser, and then change the URL to reference the name of the web service followed by OpenWebService or WSDL.
- D. Export the WSDL file to a local drive, launch a browser, and then open the WSDL file using the browser.

Answer: C

---

**QUESTION 44:**

What must a developer do before the command to show a document's folder location(s) can be used?

- A. Ensure that at least one embedded outline has "Maintain Folder Unread Information" selected.
- B. Select the Database Property for "Maintain Folder Unread Information".
- C. Ensure that there is at least one shared folder design element in the database.
- D. Select "Enable document folder tracking" from File - Preferences - Designer Preferences with Domino Designer.

Answer: A

---

**QUESTION 45:**

Sally has to check for errors on her @DbLookup command for a dialog list field. Which supported command should she use to determine if there's an error?

- A. @False
- B. @NotFound
- C. @IsError
- D. @IfError

Answer: C

---

**QUESTION 46:**

John needs to determine if his Domino application is running within the Workplace client. Which LotusScript property can be checked for this information?

- A. NotesSession.IsEmbeddedInsideWCT
- B. NotesUIWorkspace.WCTEnabled
- C. NotesUIWorkspace.IsEmbeddedInsideWCT
- D. NotesSession.WCTEnabled

Answer: C

---

**QUESTION 47:**

Ben is told that a remote Domino application at a public website has a Web service called CurrencyConverter. He needs to know the methods included in the Web service as well as how to format the requests. How can he find out this information?

- A. Access the Web service with a URL parameter of CurrencyConverter?ExportWSDL.
- B. View the CurrencyConverter Web service code using Domino Designer.
- C. View the CurrencyConverter.WSDL file of the Domino application using Domino Designer.
- D. Access the Web service with a URL parameter of CurrencyConverter?WSDL.

Answer: D

---

**QUESTION 48:**

Paul is viewing the list of form elements in the Policy Invoice application. He moves the right edge of the Name column in the Domino Designer list to show the complete form name. How can he make sure that the width of the column retains this setting?

- A. Design - Preferences - Retain column widths
- B. File - Preferences - User Preferences - Retain column widths in Designer
- C. Domino Designer column widths are persistent between sessions.
- D. Tools - Designer - Retain column widths in Designer

Answer: C

---

**QUESTION 49:**

Bill has the following statement in a dialog list field:

```
tmpValues := @DbColumn("": "NoCache"; ""; "vuwLookup"; 1);
```

@IfError(tmpValues; "No Options Found"; tmpValues)  
Is this a valid statement?

- A. No, @DbColumn will not return an error in this instance.
- B. Yes, but @IfError is not officially supported in ND7.
- C. No, because tmpValues will be null if there is an error.
- D. Yes, this is a valid error check.

Answer: B

---

**QUESTION 50:**

Francis wants to write a LotusScript agent that obtains a NotesDocumentCollection of documents modified since a certain time. What LotusScript method does Francis need to use?

- A. NotesDatabase.GetAllModifiedDocuments
- B. NotesDatabase.GetModifiedDocuments
- C. NotesDatabase.GetDocumentsSince
- D. NotesDatabase.GetChangedDocuments

Answer: B

---

**QUESTION 51:**

Jose needs to modify a Domino application that has a Web service as part of the application design. Where can he find the Web service design element?

- A. Shared Resources - Web Services
- B. Other - Web Services
- C. Shared Code - Agents
- D. Shared Code - Web Services

Answer: D

---

**QUESTION 52:**

Joanna needs to check to see if the Administration ECL in the name and address book is locked. What function will give her this information?

- A. @AdminECLIsLocked
- B. @AdministrationECLStatus
- C. @GetAdminECLStatus
- D. @IsAdminECLLocked

Answer: A

---

**QUESTION 53:**

Deborah has been turning the LotusScript debugger on and off throughout a development session. Where does Domino Designer notify the user about the LotusScript Debugger status?

- A. A scrolling message in the status line of the Domino Designer client.
- B. A pop-up alert message.
- C. No status message is displayed.
- D. The status line of the Domino Designer client.

Answer: D

---

**QUESTION 54:**

Wes needs to programmatically set the method for validating DXL that is being exported. What property will accomplish this?

- A. NotesSession.DXLValidationStyle
- B. NotesDOMParser.ValidationStyle
- C. NotesDXLExporter.ValidationStyle
- D. NotesDOMParser.DXLValidationStyle

Answer: C

---

**QUESTION 55:**

Joe would like to add a short comment to his Invoice form design to let other developers know what the form should be used for. How can Joe add this information to the form design?

- A. Add the comment information in the \$\$Comment field in the form design.
- B. Add the comment information by selecting the Invoice form in the Domino Designer client and clicking in the Comment column to edit the comment.
- C. Add the comment information to the Comments tab in the Form Properties dialog box.
- D. Add the comment information, by selecting Comments on the Object tab in the Programmer's pane.

Answer: B

---

**QUESTION 56:**

What information is reported on the Profile document for an agent that has been profiled?

- A. Agent, Server, Statement, Calls, Milliseconds Run

- B. Class, Method, Operation, Calls, Time
- C. Statement, Execution Count, Execution Time
- D. Start Time, End Time, Total Statements Executed

Answer: B

---

**QUESTION 57:**

Tom needs to add a form alias named frmInvoice to his Invoice form design element. How can he add this information to the form design?

- A. Select the Invoice form in the Domino Designer client and click in the Alias column to edit the alias.
- B. Add the alias in the Alias field in the Form Properties dialog box.
- C. On the Object tab in the Programmer's pane, select Alias and add the form alias.
- D. Delete the existing form and recreate it, specifying the alias name when the form is initially created.

Answer: A

---

**QUESTION 58:**

What are the three options of Java agent debugging?

- A. Local Agents, Remote Agents, DIIOP
- B. Server Agents, Client Agents, Browser Applets
- C. Manual Agents/Applets, Scheduled Agents, Triggered Agents
- D. Client Agents/Applets, Locally Scheduled Agents, Http Preview

Answer: D

---

**QUESTION 59:**

Harold wants to programmatically access the profiling results of an agent. Which LotusScript method can he use to return this information?

- A. NotesAgent.GetPerformanceDocument
- B. NotesSession.GetProfileResults
- C. NotesAgent.GetProfileResults
- D. NotesSession.GetPerformanceDocument

Answer: A

---

**QUESTION 60:**

Wes needs to programmatically set the method for validating DXL that is being exported.

What property will accomplish this?

- A. NotesDXLExporter.ValidationStyle
- B. NotesSession.DXLValidationStyle
- C. NotesDOMParser.ValidationStyle
- D. NotesDOMParser.DXLValidationStyle

Answer: A

---

**QUESTION 61:**

Linda needs to set the URI of the schema for the DXL being exported. What property will accomplish this?

- A. NotesSession.DXLSchemaLocation
- B. NotesDOM.SchemaLocation
- C. NotesDXLExporter.SchemaLocation
- D. NotesUIWorkspace.DXLSchemaLocation

Answer: C

---

**QUESTION 62:**

Bas has a Java agent which is not working properly. He wants to use a debugging tool to analyze the code. What is the first step that Bas needs to take to enable debugging for his Java agent?

- A. Include the "import java.debug" class in the Java agent.
- B. Launch a JPDA-compatible debugger like Eclipse with notes.jar included in the CLASSPATH variable.
- C. File - Tools - Java Debugging Preferences
- D. Debugging is always enabled for Java agents.

Answer: C

---

**QUESTION 63:**

Parker is examining a WSDL file for his Domino Web service. What role does the Types element have in the file?

- A. It defines the types of access allowed by the Web service.
- B. It defines the data types used in the Web service.
- C. It defines the browser client types that can support the Web service.
- D. It defines the method types returned by the Web service.

Answer: B

---

**QUESTION 64:**

Sally has a JavaScript library design element in a Domino application that was last signed by a developer who no longer works for the company. What new feature can she use in ND7 to resign that single design element with her ID?

- A. Click the Sign button on the Design tab of the Design Properties box.
- B. Highlight the library in Domino Designer and click the Sign button.
- C. Edit the JavaScript library design element and resave it.
- D. Launch the Administrator client and use Tools - Sign - Script Libraries.

Answer: B

---

**QUESTION 65:**

Samantha has created a Web service to return an employee's pay rate. How can Samantha secure this Web service?

- A. Define the security requirements in the WSDL file.
- B. Set the Access Control List to restrict access to the Domino application.
- C. She doesn't need to do anything because Web services run with default level security.
- D. Add the "username=" URL parameter when calling the Web service.

Answer: B

---

**QUESTION 66:**

Deborah has been turning the LotusScript debugger on and off throughout a development session. Where does Domino Designer notify the user about the LotusScript Debugger status?

- A. The status line of the Domino Designer client.
- B. A scrolling message in the status line of the Domino Designer client.
- C. No status message is displayed.
- D. A pop-up alert message.

Answer: A

---

**QUESTION 67:**

Jackie has a number of shared actions in her Domino application, and she needs to make sure the action buttons are all using standard Notes icons. What new feature in Domino Designer can she check to find this information?

- A. The Icon Type section of the Design Synopsis.

- B. The Icon field in the Shared Action property dialog box.
- C. The shared actions design column for icon type.
- D. The Find Shared Actions button in the Action Bar design element.

Answer: C

---

**QUESTION 68:**

Which option controls the frequency of the AutoSave process?

- A. Actions - AutoSave - Every nn minutes
- B. File - Preferences - User Preferences - AutoSave every nn minutes
- C. AutoSave Frequency on the Design tab of Database Properties
- D. Edit - AutoSave - Save every nn minutes

Answer: B

---

**QUESTION 69:**

Erik has written a Java agent that he wants to debug. What agent setting must he use to allow him to debug the code?

- A. Select "Compile Java code with debugging information" in the Security tab of the Agent Properties.
- B. Select "Enable remote debugging" in the Security tab of the Agent Properties.
- C. Compile the Java agent with the -debug option.
- D. Add "import java.debug.\*" in the Java agent.

Answer: A

---

**QUESTION 70:**

Chris has written a LotusScript agent that is taking longer than expected to run. Which steps should he take to analyze the agent's performance?

- A. Select "Enable agent profiling" in Database Properties.
- B. Add "Option Profile" to the "(Options)" object in the agent.
- C. Select "Profile This Agent" in the Agent Properties.
- D. File - Tools - Remote LotusScript Debugger

Answer: C

---

**QUESTION 71:**

Stan is examining a WSDL file for his Domino Web service. What role does the Binding element have in the file?

- A. It is a WSDL protocol and data format specification for a port type.
- B. It is a formatted list of attached methods for the Web service.
