

Exam : 190-702

Title : IBM Lotus Notes Domino 7 System

Ver : 11-25-08

---

**QUESTION 1:**

There is only one subtype for DDM server probes. What function does that probe provide?

- A. Monitors agents for failures
- B. Monitors NRPC traffic for failure
- C. Monitors administration requests for failures
- D. Monitors the Domino server core task for failure

Answer: C

---

**QUESTION 2:**

David, the Domino administrator, has configured Rooms & Resources across a cluster. When multiple replicas of the resource database exist in the cluster, where is processing handled if all the servers are available?

- A. The user's home server
- B. The resource's home server
- C. The first cluster server available
- D. The server closest to the physical location of the resource

Answer: B

---

**QUESTION 3:**

Mr Gruber, the Domino administrator, is launching Server Health Monitoring for the first time. What tasks are monitored by default for each server?

- A. HTTP, SMTP, AdminP and the Amgr
- B. The core server task, HTTP, SMTP and AdminP
- C. No tasks until the administrator configures the monitoring for each server
- D. All tasks currently running when the Server Health Monitor is first launched

Answer: D

---

**QUESTION 4:**

Certkiller, the Domino administrator has created a response file for a silent server installation. What parameter must be run on the server to utilize this response file?

- A. setup.exe -silent -options c:\temp\install.txt
- B. nsetup.exe -silent -options c:\temp\install.txt
- C. setup.exe -response -options c:\temp\install.txt

D. silent.exe -response -options c:\temp\install.txt

Answer: A

---

**QUESTION 5:**

The Domino Console connects to the Controller over what default port?

- A. 80
- B. 1352
- C. 1533
- D. 2050

Answer: D

---

**QUESTION 6:**

A collection hierarchy synchronizes data to a central server using what Domino capability?

- A. Email
- B. Clustering
- C. Selective replication
- D. The server task DDMSync

Answer: C

---

**QUESTION 7:**

You must create a DDM collection hierarchy to initiate which of the following?

- A. Data roll-up
- B. Probe initiation
- C. Probe interface
- D. Data interface

Answer: A

---

**QUESTION 8:**

Domino Domain Monitoring (DDM) enhanced events may contain events from one of the following?

- A. Events generated by a Domino event generator
- B. Events that are reported to the Domino server console
- C. Events that occur on the local Domino Administrator client

D. Events not generated by agents or that do not apply to databases

Answer: A

---

**QUESTION 9:**

You wish to resolve an issue without user intervention based on a received event in DDM. Which handler notification method provides this functionality?

- A. Pager
- B. Broadcast
- C. Run an Agent
- D. Log to Database

Answer: C

---

**QUESTION 10:**

Cherease has noticed that a server has been rated Warning in the Health Monitoring reports. What index value must be met for a server to be rated Warning?

- A. Greater than the rules algorithm
- B. Greater than the Warning threshold
- C. Greater than the Critical threshold
- D. Greater than the assessment algorithm

Answer: B

---

**QUESTION 11:**

Smart Upgrade failover utilizes what search order?

- A. By document link in the Notes client
- B. By server name and hard-coded path to the Smart Upgrade database
- C. By database replica ID and database name in the home server cluster
- D. By notes.ini variable on the client listing all servers in the domain which the Smart Upgrade database may be found

Answer: C

---

**QUESTION 12:**

If the Fault Analyzer task locates duplicate fault reports, which is the next step the task will take?

- A. The new crash will be reported as a response to the original crash

- B. The new crash will not be reported because it matches a previous fault reported
- C. The new crash will be reported as a new document and a doclink will be created to the original
- D. The new crash will be reported as a new document and no reference to matching documents will be created

Answer: A

---

**QUESTION 13:**

Todd is configuring a DDM Messaging probe to test Delivery Status Notifications. What must the remote mail system support for these probes to function correctly?

- A. The .nsd extension
- B. The .ddm extension
- C. The .dsn extension
- D. The .smtp extension

Answer: C

---

**QUESTION 14:**

A Domino Domain Monitoring (DDM) probe is defined as which of the following?

- A. A specially-designated collection server
- B. A server task loaded on each server that checks services, agents and databases
- C. A discrete check configured to run against one or more servers, databases, and services
- D. A client that is configured to query servers for Domino services, running agents and failed AdminP processes

Answer: C

---

**QUESTION 15:**

In the desktop policy settings document, how are client lock-down settings applied?

- A. Per tab
- B. Per date
- C. Per field
- D. Per version

Answer: A

---

**QUESTION 16:**

Automatic Diagnostic Collection stores reports in Fault Report documents. In what database are these documents stored?

- A. DDM.nsf
- B. Reports.nsf
- C. In the log.nsf of each server
- D. A mail-in database defined by the administrator

Answer: D

---

**QUESTION 17:**

The Domino administrator has enabled AutoSave for all users. Where are AutoSave documents stored?

- A. To a user's local database
- B. To a user's mail database located on the server
- C. To an administrator defined server database per user
- D. To an administrator defined central repository database

Answer: A

---

**QUESTION 18:**

Replication on selected servers and databases is monitored in DDM according to the schedule specified in what document?

- A. Probe
- B. Server
- C. Connection
- D. Configuration

Answer: A

---

**QUESTION 19:**

Betty has modified a DDM probe document. What must be performed for this probe change to become active immediately?

- A. Run the console command "reload probes"
- B. Run the console command "restart probes"
- C. Do nothing as modified probe documents take effect immediately
- D. Probes are automatically reloaded based on the configuration time specified in DDM.nsf

Answer: C

**QUESTION 20:**

The Domino administrator is attempting to verify that IMAP requests are being processed correctly. Which probe should be created to monitor those types of requests?

- A. SMTP Process State
- B. POP3 Process State
- C. Message access TCP Port Health
- D. Message retrieval TCP Port Health

Answer: D

---

**QUESTION 21:**

Users that wish to utilize the Smart Upgrade feature to upgrade a full client installation must have what variable present on the client?

- A. InstallType=1
- B. InstallType=2
- C. InstallType=4
- D. InstallType=6

Answer: B

---

**QUESTION 22:**

Bob, the Domino administrator, is having issues with character sets and messages that get disclaimers added by the server. Which of the following configuration changes should he make to correct this issue?

- A. He should remove the character sets from the server
- B. He should have the Notes client add the disclaimers
- C. He should add the missing character sets to the server
- D. He should change the message disclaimer to add a question mark wherever character sets are utilized

Answer: B

---

**QUESTION 23:**

The effective mail policy for a user is stored in what location?

- A. The local id file for the user
- B. The local Notes client notes.ini file
- C. The calendar profile in a user's mail file

D. The server notes.ini file in a parameter for each user

Answer: C

---

**QUESTION 24:**

Private server blacklists are stored in what database?

- A. names.nsf
- B. blacklist.nsf
- C. smtpconf.nsf
- D. A Domino administrator defined database

Answer: A

---

**QUESTION 25:**

Which server task checks connecting hosts to verify if they are a member of a DNS whitelist?

- A. LDAP
- B. SMTP
- C. MIME
- D. Router

Answer: B

---

**QUESTION 26:**

If the client is configured to disclaim send Notes RTF messages to the Internet, the client adds the disclaimer to the message. The message is then converted from RTF to what format?

- A. CD
- B. MIME
- C. NRPC
- D. It remains in RTF format

Answer: B

---

**QUESTION 27:**

What Domino feature must be enabled to monitor the number of active Domino Web Access users?

- A. Activity logging

- B. Server health reports
- C. Domino Domain Monitoring
- D. Server monitoring in the Domino Administration client

Answer: A

---

**QUESTION 28:**

A user wishes to utilize the new Calendar Cleanup functionality in the Notes client. What are the possible options when configuring the tool?

- A. "Delete entries that occurred after" and "Remove entries older than"
- B. "Mark entries that occurred over" and "Move to trash entries that occurred after"
- C. "Remove entries entered after" and "Mark entries for deletion that occurred over"
- D. "Delete entries that occurred over" and "Delete entries that occurred before"

Answer: D

---

**QUESTION 29:**

Janoz, the Domino administrator, does not want private whitelisted hosts to not have any logging performed on the filter checks. Which setting should he select?

- A. Log only
- B. Log and tag message
- C. Do not log connection
- D. Silently skip blacklist filters

Answer: D

---

**QUESTION 30:**

Bettina, the Domino administrator, is having issues with numerous mail rules acting on a message. What should she do to interrupt the mail rules from being processed?

- A. Create a 'stop processing' action in the rules
- B. Issue a 'stop processing' command on the server console
- C. Issue a 'stop processing' command on the server through a program document
- D. Create an agent in mail.box to stop all rule processing after a certain time

Answer: A

---

**QUESTION 31:**

When an S/MIME signed message has a disclaimer added by the server and is received by a Notes user, which of the following is the result?

- A. The signature cannot be verified
- B. The signature is stripped from the message
- C. The message cannot be read by the recipient
- D. The message cannot be transmitted and is returned to the user

Answer: A

---

**QUESTION 32:**

DNS whitelists may be overridden by which of the following?

- A. Server based mail rules
- B. Server signed agents in mail.box
- C. Private whitelists and DNS blacklists
- D. Private whitelists and private blacklists

Answer: D

---

**QUESTION 33:**

In what order is blacklist and whitelist filtering processed on a received SMTP message?

- A. DNS blacklists, DNS whitelists, private blacklists, private whitelists
- B. DNS whitelists, DNS blacklists, private whitelists, private blacklists
- C. Private blacklists, DNS blacklists, private whitelists, DNS whitelists
- D. Private whitelists, private blacklists, DNS whitelists, DNS blacklists

Answer: D

---

**QUESTION 34:**

Custom password policies will support which of the following with Notes id files?

- A. Random password generation
- B. IDs protected with Smartcards
- C. Forcing unique characters
- D. IDs protected with multiple passwords

Answer: C

---

**QUESTION 35:**

Certkiller, the Domino administrator, is creating a probe for DDM. What are the possible scheduling options the probe could run?

- A. A schedule that Brenda specifies
- B. A schedule decided by the administration hub server
- C. An as-needed schedule as configured by Brenda
- D. DDM probe schedules may not be modified and must use the default settings

Answer: A

---

**QUESTION 36:**

A Domino Domain Monitoring (DDM) probe has sent an event that generated an alert. The event is currently unassigned. You immediately change the state of the event to closed. What happens to the assigned state?

- A. The event will be assigned to yourself
- B. The event will be deleted from the ddm.nsf database
- C. The event will enter a routing queue to be assigned
- D. The event will be assigned to an administrator for review

Answer: A

---

**QUESTION 37:**

S/MIME mail messages being sent to the Internet are having message disclaimers applied by the server. However, recipients are unable to unencrypt or read the body. What step(s) should the Domino administrator take to ensure that the messages can be read by the Internet recipients?

- A. Configure the S/MIME certificate inside the policy applying the message disclaimer
- B. Enable the flag in the policy document to skip adding disclaimers on S/MIME messages
- C. Configure the new S/MIME task on the Domino server to read and apply the disclaimers
- D. Disable the server from applying message disclaimers and enable them to be added by the client

Answer: D

---

**QUESTION 38:**

Susan has a number of open Notes documents in her Notes client, and she would like to quickly close all the tabs at once. How can she do this?

- A. Actions ?Close All Tabs
- B. File ?Close Current Open
- C. Actions ?Close Current Open
- D. File ?Close All Open Window Tabs

Answer: D

---

**QUESTION 39:**

What is the process used to update the set of Notes public and private keys that is stored in user and server ID files?

- A. Key rollover
- B. Custom password policies
- C. LTPA name mapping process
- D. 128-bit encryption process

Answer: A

---

**QUESTION 40:**

Which of the following is the purpose of the RnRMgr task?

- A. To create an individual document for each mail user in the new RnRBusytime database with busytime marked
- B. To watch for reservation requests in an R&R database and to process them in the order in which they arrive or were created
- C. To scan all the mail users, rooms and resources in the domain and populate the busytime database with the freetime for each one
- D. To obtain a list of all rooms and resources across the local and foreign domains and consolidate the freetime into a single busytime database on a daily basis

Answer: B

---

**QUESTION 41:**

You wish to see the history of an Event document to see the previous event state change activity in ddm.nsf. Where would you find this information?

- A. Event Change History
- B. Event History Changes
- C. Event Modification Changes
- D. Event Modification History

Answer: A

---

**QUESTION 42:**

Smart Upgrade tracking reports may be sorted and viewed in what possible ways?

- A. Remote, local, failed, succeeded, and date
- B. Server, client, user, date, failed and succeeded
- C. Full client, Notes client, date, version and operating system
- D. Version, succeeded, failed, cancelled, date and operating system

Answer: D

---

**QUESTION 43:**

Hermann, the Domino administrator, needs to get the status of the Domino server's Smart Upgrade cache. What server console command would he enter?

- A. sucache show
- B. load sucache
- C. show smupgrade
- D. tell smupgrade show

Answer: A

---

**QUESTION 44:**

New users are attempting to change their Lotus Notes user.id password. However, anyone that attempts to end the new password with an exclamation point is denied from using that new password. What is the cause of this denial?

- A. Custom client policy
- B. Custom desktop policy
- C. Custom control policy
- D. Custom password policy

Answer: D

---

**QUESTION 45:**

How many days is the default period for a user rename request to remain active?

- A. 14 days
- B. 21 days
- C. 30 days
- D. 60 days

Answer: B

---

**QUESTION 46:**

You wish to resolve an issue without user intervention based on a received event in DDM. Which handler notification method provides this functionality?

- A. Pager
- B. Broadcast
- C. Run an Agent
- D. Log to Database

Answer: C

---

**QUESTION 47:**

The Domino Domain Monitoring (DDM) probe for Error Monitoring monitors which of the following?

- A. Key APIs in NSF and NIF
- B. Errors that occur when a database is compacted
- C. Unused space in a database and database inactivity
- D. Errors that occur when the design of a database is updated

Answer: A

---

**QUESTION 48:**

Users that wish to utilize the Smart Upgrade feature to upgrade a full client installation must have what variable present on the client?

- A. InstallType=1
- B. InstallType=2
- C. InstallType=4
- D. InstallType=6

Answer: B

---

**QUESTION 49:**

A Domino Domain Monitoring (DDM) probe is defined as which of the following?

- A. A specially-designated collection server
- B. A server task loaded on each server that checks services, agents and databases
- C. A discrete check configured to run against one or more servers, databases, and services
- D. A client that is configured to query servers for Domino services, running agents and failed AdminP processes

Answer: C

---

**QUESTION 50:**

Otto, the Domino administrator has created a response file for a silent server installation. What parameter must be run on the server to utilize this response file?

- A. setup.exe -silent -options c:\temp\install.txt
- B. nsetup.exe -silent -options c:\temp\install.txt
- C. setup.exe -response -options c:\temp\install.txt
- D. silent.exe -response -options c:\temp\install.txt

Answer: A

---

**QUESTION 51:**

Marie, the Domino administrator, wishes to modify an existing DDM probe document. What database contains these documents?

- A. DDM.nsf
- B. Names.nsf
- C. Admin4.nsf
- D. Events4.nsf

Answer: D

---

**QUESTION 52:**

Domino Domain Monitoring (DDM) contains how many classes of event information?

- A. One
- B. Two
- C. Three
- D. Four

Answer: B

---

**QUESTION 53:**

Therese, the Domino administrator, has configured Rooms & Resources across a cluster. When multiple replicas of the resource database exist in the cluster, where is processing handled if all the servers are available?

- A. The user's home server
- B. The resource's home server
- C. The first cluster server available
- D. The server closest to the physical location of the resource

Answer: B

---

**QUESTION 54:**

The collected probe results in a DDM collection hierarchy database are replicated when which of the following occurs?

- A. A collection server initiates a push replication with a spoke server
- B. A collection server is notified about the change in an event state on a monitored server
- C. A collection server receives the console command 'probe xxx' where xxx is a remote server
- D. A collection server obtains a SMTP message in the ddm.nsf database notifying it to pull new events

Answer: B

---

**QUESTION 55:**

If the Fault Analyzer task locates duplicate fault reports, which is the next step the task will take?

- A. The new crash will be reported as a response to the original crash
- B. The new crash will not be reported because it matches a previous fault reported
- C. The new crash will be reported as a new document and a doclink will be created to the original
- D. The new crash will be reported as a new document and no reference to matching documents will be created

Answer: A

---

**QUESTION 56:**

The AutoSave feature of Domino uses the database with which of the following names?

- A. autosave.nsf
- B. safecopy.nsf
- C. autosave\_xx.nsf where xx is the user's initials
- D. as\_xxxxxxxx.nsf where xx is the user's abbreviated name

Answer: D

---

**QUESTION 57:**

When creating a collection hierarchy in Domino Domain Monitoring (DDM), what is an available option for defining servers in the hierarchy?

- A. One server will collect from all others in the domain
- B. All servers collect their own data and email results to a central server
- C. One administrator client polls all the servers and keeps the data locally
- D. One administrator client collects all the data and replicates to a central server

Answer: A

---

**QUESTION 58:**

In which of the following databases does the Server Health Monitor store its health reports?

- A. shmon.nsf
- B. dommon.nsf
- C. statrep.nsf
- D. serverhm.nsf

Answer: B

---

**QUESTION 59:**

Automatic Diagnostic Collection stores reports in Fault Report documents. In what database are these documents stored?

- A. DDM.nsf
- B. Reports.nsf
- C. In the log.nsf of each server
- D. A mail-in database defined by the administrator

Answer: D

---

**QUESTION 60:**

The DDM web configuration probe will evaluate which of the following document types?

- A. Web Server configurations document, Web Programs document, and the Program document
- B. Server document, the Connections document, and the File Identifications document
- C. Server document, the Internet Site document, and the Web Server Configurations document
- D. Internet Site document, Web Server Configurations document and the File Identifications document

Answer: C

**QUESTION 61:**

John noticed that the mail-in database that stores server diagnostic information is growing large. What setting should Sally adjust to limit messages for automatic diagnostic data collection?

- A. The diagnostic file patterns
- B. The maximum size of diagnostic message including attachments (in MB)
- C. The minimum size of collection message including attachments (in MB)
- D. The name of the mail-in database used for receiving automatic diagnostic data

Answer: B

---

**QUESTION 62:**

Smart Upgrade failover utilizes what search order?

- A. By document link in the Notes client
- B. By server name and hard-coded path to the Smart Upgrade database
- C. By database replica ID and database name in the home server cluster
- D. By notes.ini variable on the client listing all servers in the domain which the Smart Upgrade database may be found

Answer: C

---

**QUESTION 63:**

A special type of application probe for DDM always runs and requires no configuration. Which of the following are monitored by this probe?

- A. Agent security rights
- B. Disabled agents for the compact task
- C. Agents that terminate abnormally when the maximum time to run is exceeded
- D. SQL query operations performed on databases that are not full-text indexed

Answer: C

---

**QUESTION 64:**

The Domino Console connects to the Controller over what default port?

- A. 80
- B. 1352
- C. 1533
- D. 2050

Answer: D

---

**QUESTION 65:**

Which of the following policies offer client lock-down?

- A. Mail policy and security policy settings
- B. Mail policy and archive policy settings
- C. Desktop policy and mail policy settings
- D. Desktop policy and archive policy settings

Answer: C

---

**QUESTION 66:**

Cherelle, the Domino administrator, is launching Server Health Monitoring for the first time. What tasks are monitored by default for each server?

- A. HTTP, SMTP, AdminP and the Amgr
- B. The core server task, HTTP, SMTP and AdminP
- C. No tasks until the administrator configures the monitoring for each server
- D. All tasks currently running when the Server Health Monitor is first launched

Answer: D

---

**QUESTION 67:**

Which DDM Directory probe monitors the availability of all directories being served by the server and reports any errors?

- A. LDAP TCP Port Health
- B. Directory Availability
- C. NAMELookup Search Response
- D. Directory Catalog Aggregation Schedule

Answer: B

---

**QUESTION 68:**

Which of the following does the Mail Policy define for a user?

- A. Define the ability to set the color scheme for the mail file
- B. Define the ability for a user to reserve a room in calendaring
- C. Define the ability for a user to modify their Internet password
- D. Define the ability for a user to issue delegation to their mail file

Answer: D

---

**QUESTION 69:**

If a DNS whitelist query returns an IP address, which of the following is the Domino server's next step?

- A. The host is added to the whitelist and the blacklists are then checked
- B. The host is added to the whitelist and the remaining DNS whitelists are not searched
- C. The private blacklists are queried and if the connecting host is found, the message is rejected
- D. The private whitelists are queried and other connections are held until processing is done

Answer: B

---

**QUESTION 70:**

In what order is blacklist and whitelist filtering processed on a received SMTP message?

- A. DNS blacklists, DNS whitelists, private blacklists, private whitelists
- B. DNS whitelists, DNS blacklists, private whitelists, private blacklists
- C. Private blacklists, DNS blacklists, private whitelists, DNS whitelists
- D. Private whitelists, private blacklists, DNS whitelists, DNS blacklists

Answer: D

---

**QUESTION 71:**

Cindy, the Domino administrator, is having issues with numerous mail rules acting on a message. What should she do to interrupt the mail rules from being processed?

- A. Create a 'stop processing' action in the rules
- B. Issue a 'stop processing' command on the server console
- C. Issue a 'stop processing' command on the server through a program document
- D. Create an agent in mail.box to stop all rule processing after a certain time

Answer: A

---

**QUESTION 72:**

Byron, the Domino administrator, does not want private whitelisted hosts to not have any logging performed on the filter checks. Which setting should he select?

- A. Log only

- B. Log and tag message
- C. Do not log connection
- D. Silently skip blacklist filters

Answer: D

---

**QUESTION 73:**

When an S/MIME signed message has a disclaimer added by the server and is received by a Notes user, which of the following is the result?

- A. The signature cannot be verified
- B. The signature is stripped from the message
- C. The message cannot be read by the recipient
- D. The message cannot be transmitted and is returned to the user

Answer: A

---

**QUESTION 74:**

What Domino feature must be enabled to monitor the number of active Domino Web Access users?

- A. Activity logging
- B. Server health reports
- C. Domino Domain Monitoring
- D. Server monitoring in the Domino Administration client

Answer: A

---

**QUESTION 75:**

Mark, the Domino administrator, has configured explicit, organizational units and organization policies to contain message disclaimers. Presuming a user matches all the policies created and sends a mail message, what disclaimer will be applied?

- A. The user will have all the policy disclaimers applied to the mail message
- B. The user will have only the explicit policy disclaimer applied to the mail message
- C. The user will have the organizational policy disclaimer applied to the mail message
- D. The user will have no disclaimer applied to the mail message since there are multiple matches

Answer: B

---

**QUESTION 76:**

Which server task checks connecting hosts to verify if they are a member of a DNS whitelist?

- A. LDAP
- B. SMTP
- C. MIME
- D. Router

Answer: B

---

**QUESTION 77:**

Blacklist processing on the server follows which order?

- A. Private then public
- B. Public then private
- C. Shared then controlled
- D. Managed then controlled

Answer: A

---

**QUESTION 78:**

What is the process used to update the set of Notes public and private keys that is stored in user and server ID files?

- A. Key rollover
- B. Custom password policies
- C. LTPA name mapping process
- D. 128-bit encryption process

Answer: A

---

**QUESTION 79:**

Brenda, the Domino administrator, is creating a probe for DDM. What are the possible scheduling options the probe could run?

- A. A schedule that Brenda specifies
- B. A schedule decided by the administration hub server
- C. An as-needed schedule as configured by Brenda
- D. DDM probe schedules may not be modified and must use the default settings

Answer: A

---

**QUESTION 80:**

To assign an event to an administrator, or to reassign events that are owned by another administrator, you must have a minimum of what role and rights in the ACL for ddm.nsf?

- A. Author access with the role Change Owner
- B. Author access with the role Assign Events
- C. Editor access with the role Assign Events
- D. Editor access with the role Change Owner

Answer: C

---

**QUESTION 81:**

Which of the following is the purpose of the RnRMgr task?

- A. To create an individual document for each mail user in the new RnRBusytime database with busytime marked
- B. To watch for reservation requests in an R&R database and to process them in the order in which they arrive or were created
- C. To scan all the mail users, rooms and resources in the domain and populate the busytime database with the freetime for each one
- D. To obtain a list of all rooms and resources across the local and foreign domains and consolidate the freetime into a single busytime database on a daily basis

Answer: B

---

**QUESTION 82:**

William, the Domino administrator, has issued a name change request for a user. The user rejected the name change request when prompted. What step, if any, must William take next to complete the name change request?

- A. William must manually choose to reject or reissue the name change
- B. Nothing, as AdminP will process the rejection and reject the name change
- C. Nothing, as the user no longer has a choice to reject name change requests
- D. William must configure AdminP to automatically process name change rejections

Answer: A

---

**QUESTION 83:**

Mitch, the Domino administrator, is listed as editor in the database ACL and can see the results from probes in the ddm.nsf database. However he is unable to assign the events to the proper people. What is the cause?

- A. You may not assign events in ddm.nsf
- B. He does not have the role 'Assign Events'
- C. He does not have the role 'Event Assignor'
- D. He does not have Manager rights in the database ACL

Answer: B

---

**QUESTION 84:**

New users are attempting to change their Lotus Notes user.id password. However, anyone that attempts to end the new password with an exclamation point is denied from using that new password. What is the cause of this denial?

- A. Custom client policy
- B. Custom desktop policy
- C. Custom control policy
- D. Custom password policy

Answer: D

---

**QUESTION 85:**

DaJuan wishes to review the status of all the successful Smart Upgrades performed but finds that some of the reports are missing. What is the cause of these missing reports?

- A. Successful Smart Upgrades do not generate reports
- B. Smart Upgrades have no reporting associated with them
- C. He is not currently looking at the reports in the archive view
- D. He waited to view reports outside of the number of days to keep reports

Answer: D

---

**QUESTION 86:**

Tom, an end user, has launched his Notes client after it crashed and AutoSave has notified him that documents are available for recovery. If a document Tom is attempting to recover has already been modified on the server, which action will the Notes client perform?

- A. Tom is given the option to overwrite or create a new document
- B. Tom will manually have to compare the documents and enter the information
