The Power of Knowing

Exam : 000-190

Title : AIX Basic Operations V5□□

Ver : 12-16-08

QUESTION 1:

What is contained in the .exrc file?

- A. The default crash recovery file name
- B. The list of environmental commands
- C. A scratch pad area for temporary data
- D. An automatic backup of the text being edited

Answer: B

QUESTION 2:

Which command will cancel the print job number 123 from the Post Script "PS" print queue?

- A. qcan -P 123
- B. qcan -X PS 123
- C. qcan -X -P PS 123
- D. qcan -P PS -x 123

Answer: D

QUESTION 3:

Which command would be used to show the current system host names that have access to a user's X Server?

- A. xinit
- B. cat /.rhost
- C. xhost
- D. xdm -config

Answer: C

QUESTION 4:

What is the correct command to save the output of the command in one file and the error messages in another?

- A. command 1>file1 2>&1
- B. command 1>file1 2>file2
- C. command 1>file1 2>file1
- D. command 2>file2 1>&2

Answer: B

QUESTION 5:

A directory with files can be deleted with which of the following commands?

- A. rm -r
- B. mvdir
- C. touch
- D. rmdir

Answer: A

QUESTION 6:

Where will the final output be placed after this sequence of piped commands? `ls -l | pg <list`

- A. list
- B. terminal screen
- C. root directory
- D. default system printer

Answer: B

QUESTION 7:

The syntax for the "join" command in the online WEB based documentation displays:

```
join [-a FileName][[-v Filenumber][[-e String][[-o List]
[-t Character][[-1 Field][[-2 Field] File1 File2
```

In which section in the join documentation of the WEB based online documentation could more information about the "-a" option be found?

- A. Flags
- B. Purpose
- C. Description
- D. Implementation

Answer: A

QUESTION 8:

Which command will invoke the man pages for the pwd command?

- A. catman -w pwd

- B. man pwd
- C. man -k pwd
- D. man -f pwd

Answer: B

QUESTION 9:

Which of the following AIX commands should be used to create a directory?

- A. cp
- B. mv
- C. mkdir
- D. rm

Answer: C

QUESTION 10:

Which command will measure the network response time of a remote machine?

- A. ftp
- B. ping
- C. trace
- D. netstat

Answer: B

QUESTION 11:

Which dd command is using a relative path name as the source argument and an absolute path name as its target argument?

- A. dd if=/home/blue of=
- B. dd if=blue of=/dev/rmt0
- C. dd if=blue of=./dev/fd0
- D. dd if=/home/green of=/u/blue/green

Answer: B

QUESTION 12:

Which of the following commands will save the file the user is editing and not exit vi?

- A. :wq
- B. :w

- C. :x
- D. ZZ

Answer: B

QUESTION 13:

What file can be used to alter a user's login environment in the Korn shell?

- A. /ENV
- B. .kshrc
- C. /etc/.profile
- D. /home/profile

Answer: B

QUESTION 14:

Which method would be used to cancel the print job number 321 that was submitted to the color print queue using the System V printer subsystem commands?

- A. cancel color
- B. cancel -u 321
- C. cancel 321
- D. cancel -u color

Answer: C

QUESTION 15:

What is necessary to use the contents of a file as input for an AIX command?

- A. Redirect standard input.
- B. Append standard input.
- C. Redirect standard output, then standard input.
- D. Type the contents of the file onto the command line.

Answer: A

QUESTION 16:

Which command should be used to print a file named "color_file" to the print queue color?

- A. enq color_file
- B. qprt color_file

- C. enq -P psc color_file
- D. enq -P color color_file

Answer: D

QUESTION 17:

Which command can be used to enter the vi editor and create the file "myfile" without generating any errors?

- A. vi myfile
- B. vi -c myfile
- C. vi -y myfile
- D. vi -t myfile

Answer: A

QUESTION 18:

Which of the following displays information about the rpc_\$register library routine using the man command?

- A. man -f rpc_\$register
- B. man rpc_\\$register
- C. man rpc_\$register
- D. man -M rpc_\\$register

Answer: B

QUESTION 19:

What is the proper command to read a multi-page file one page at a time?

- A. cat
- B. type
- C. show
- D. more

Answer: D

QUESTION 20:

When ftping, what is the command to send a file to a remote machine?

- A. put
- B. open

- C. ntrans
- D. stream

Answer: A

QUESTION 21:

Which of the following vi commands would be used to change the next two words?

- A. c2w
- B. 2R
- C. 2cw
- D. r2

Answer: A

QUESTION 22:

Which keystroke sequence can be used to suspend a process in the Korn shell so it may be restarted at a later time?

- A. Ctrl-c
- B. Ctrl-q
- C. Ctrl-x
- D. Ctrl-z

Answer: D

QUESTION 23:

Which of the following vi commands would be used to change all occurrences of the word "text" to the string "my text"?

- A. :/text/s/my text/g
- B. :g/ text /s// my text /g
- C. :g/text /s/my text /g
- D. :g/text/s/my text/g

Answer: B

QUESTION 24:

If in home (/home), what command can be run to determine if the file "plants" is a directory without viewing the contents?

- A. ls -lad plants

- B. ls -fa plants
- C. li -la plants
- D. li -fa plants

Answer: A

QUESTION 25:

What is the correct flag to telnet to a remote machine as a specific user?

- A. tn -f
- B. tn -d
- C. tn -p hostname
- D. tn -l user hostname

Answer: D

QUESTION 26:

Which of the following is the vi editor command that will delete one word at a time while in command mode?

- A. cc
- B. dd
- C. dw
- D. rw

Answer: C

QUESTION 27:

How can permissions for the chmod command be written?

- A. As a hex number
- B. In either octal or symbolic notation
- C. As strings of "rwx" to picture the layout of the permissions
- D. In the first line of a file when it is created, and then interpreted by the shell

Answer: B

QUESTION 28:

In a Korn shell which command would be used to set the terminal type to aixterm?

- A. env TERM=aixterm
- B. set \$TERM=aixterm

- C. export TERM=aixterm
- D. export \$TERM=aixterm

Answer: C

QUESTION 29:

Which mail command is used to automatically send a note back to the originator of an e-mail message?

- A. r command
- B. f command
- C. .reply file must exist
- D. .forward file must exist

Answer: A

QUESTION 30:

Which command will display all lines in file1 that contain the string abc but NOT the string xyz?

- A. grep -E "abc&!xyz] file1
- B. grep abc file1 | grep -v xyz file1
- C. grep [abc][^xyz] file1
- D. grep -v xyz "abc" file1

Answer: A

QUESTION 31:

Which key should be pressed in the vi editor to enter text-input mode and begin inserting text BEFORE the cursor position?

- A. a
- B. i
- C. \$
- D. o

Answer: B

QUESTION 32:

If the current directory is /tmp, which command will display the available file system space in the user's current directory?

- A. df .
- B. du \$tmp
- C. du .
- D. df \$tmp

Answer: A

QUESTION 33:

Which command will display the current working directory?

- A. pwd
- B. dosdir
- C. oldpwd
- D. echo \$DIR

Answer: A

QUESTION 34:

Which command displays the total block usage for all files in a directory?

- A. dc
- B. df
- C. du -s
- D. ls -al

Answer: C

QUESTION 35:

Which vi command can be used to copy a line of text into the text buffer?

- A. i
- B. r
- C. yy
- D. cc

Answer: C

QUESTION 36:

Which command should be used to permit ONLY the owner to use the script file named savemachine as an executable script?

- A. chmod 777 savemachine

- B. `chmod -x ./savemachine`
- C. `chmod u=rwx,go= savemachine`
- D. `chmod go-w+x savemachine`

Answer: C

QUESTION 37:

Which of the following commands should be used to list all the files and directories in the current working directory that have the string 'foo' in their name?

- A. `ls foo`
- B. `ls foo*`
- C. `ls *foo*`
- D. `ls *foo?`

Answer: C

QUESTION 38:

What should be done to test the lines of a shell script?

- A. Use the `exec` command
- B. Run the shell syntax checker `shck`
- C. Model them with a high level language (e.g., "C") first
- D. Enter each one at the command line and check the results

Answer: D

QUESTION 39:

When executed on a single line, which commands will cause a syntax error?

- A. `cd ; ./profile`
- B. `ps -ef | grep init`
- C. `TERM=ibm3151 / export TERM`
- D. `find /etc -print | grep motd`

Answer: C

QUESTION 40:

What is required to use the `cp` command to copy multiple files to a directory?

- A. The last item listed for the command must be the directory.
- B. A full path must be specified for each item in the command list.

- C. The target directory must be listed first and the files follow.
- D. A list of file names is directed to standard in and the name of the directory is assigned to standard error.

Answer: A

QUESTION 41:

What is the command to show the messages in folder work?

- A. mail work
- B. mail -f +work
- C. mail -i work
- D. mail -F +work

Answer: B

QUESTION 42:

Which command will display all lines in file1 that begin with the string abc and end with the string xyz ?

- A. grep "^abc*xyz\$" file1
- B. grep abc*xyz\\n file1
- C. grep ^abc file1 | grep -v xyz\$ file1
- D. grep "^abc" file1 | grep "xyz\$"

Answer: D

QUESTION 43:

Which of the following vi commands could be used to delete the current line of text and enter insert mode?

- A. dd
- B. cc
- C. Oxi
- D. C

Answer: B

QUESTION 44:

Which of the following commands would be used to move the current line of text?

- A. yy

- B. "a1yy
- C. dd
- D. : "a1dd

Answer: C

QUESTION 45:

What is the correct user command to remove the link foo?

- A. ln -s foo /dev/null
- B. ln foo garbage
- C. unlink foo
- D. rm foo

Answer: D

QUESTION 46:

Which of the following can be used to display a listing of all processes currently executing on a machine?

- A. ps
- B. psh
- C. ps -f
- D. ps -ef

Answer: D

QUESTION 47:

Which command can be used to list or modify previously executed shell commands?

- A. fc
- B. env
- C. prev
- D. edit

Answer: A

QUESTION 48:

Which of the following commands should be used to remove an empty directory in the current directory named -dir?

- A. rmdir -p -dir

- B. `rmdir -p "-dir"`
- C. `rmdir -- -dir`
- D. `rmdir '-dir'`

Answer: C

QUESTION 49:

Which of the following commands should be used to list all files in the root filesystem that are named `.profile`?

- A. `find . -name .profile`
- B. `find / -name .profile -print`
- C. `find * -name "*profile" -ls`
- D. `find ../. .profile -exec ls -l`

Answer: B

QUESTION 50:

By default, double-clicking the left mouse button on a word of text initiates what action inside an AIX Windows environment?

- A. COPY of that word
- B. PASTE of that word
- C. CUT of the line of text containing that word
- D. PASTE of the line of text containing that word

Answer: A

QUESTION 51:

What happens with files removed with the `rm` command?

- A. They are not recoverable unless restored within approximately five minutes.
- B. They are stored in `/tmp` and deleted later by the skulker program.
- C. They are recoverable with commands derived from DOS.
- D. They are not recoverable.

Answer: D

QUESTION 52:

When is a window ready to receive input or other window manager functions?

- A. It has been minimized.

- B. It is the only visible window on the display.
- C. Any portion of the window is visible.
- D. It it has been selected for input focus.

Answer: D

QUESTION 53:

After many operations have been performed by a given AIX user, which command will place the user back into their home directory?

- A. cd
- B. cd .
- C. cd ./home
- D. cd ../home

Answer: A

QUESTION 54:

With multiple print queues defined, what is the most appropriate command to display the status of all print queues on a system?

- A. lpq
- B. qchk
- C. lpstat
- D. qconfig

Answer: C

QUESTION 55:

Which vi command string searches a file for the first instance of the phrase "the one and only"?

- A. /the one and only/
- B. //the one and only/
- C. /the one and only/s
- D. /the one and only/g

Answer: A

QUESTION 56:

What is a valid format to remove a file named Machine*.\$CLUSTER.txt?

- A. rm Machine*."\$CLUSTER".txt
- B. rm "Machine*.\$CLUSTER.txt"
- C. rm 'Machine*.\$CLUSTER.txt'
- D. rm "Machine*.\$CLUSTER.txt"

Answer: C

QUESTION 57:

Which command lists all files in the /home file system?

- A. find . -name /home
- B. find /home -print
- C. find . -name all
- D. find /home -type all

Answer: B

QUESTION 58:

What AIX command displays the current status information regarding specified print jobs, print queues, or users?

- A. qcan
- B. qprt
- C. qchk
- D. qhld

Answer: C

QUESTION 59:

What is the correct term for a path name that starts with a slash (/) ?

- A. relative pathname
- B. absolute pathname
- C. current working directory
- D. parent directory

Answer: B

QUESTION 60:

Which vi command can be used to change the location of the cursor position to line 16 of a file?

- A. 16
- B. j16
- C. /16
- D. :16

Answer: D

QUESTION 61:

What is displayed by the command `grep "^[a-zA-Z]" pgm.s`?

- A. All lines in pgm.s that begin with a letter
- B. All words in pgm.s that begin with a letter
- C. All files in the pgm.s directory that begin with a letter
- D. All processes beginning with a letter that are a child process of pgm.s

Answer: A

QUESTION 62:

What happens to a background process when the user logs out?

- A. All background processes can be left running without doing anything after logging off.
- B. Background processes run with a higher priority than foreground processes.
- C. Background processes used with the `nohup` command can be left running after logging off.
- D. Background processes used with the `nohup` command have a higher priority than foreground processes.

Answer: C

QUESTION 63:

If the current directory was `/home/guest`, which command would the user execute to list all permissions of all files in all subdirectories of `/home/guest`?

- A. `ls -l`
- B. `ls -R`
- C. `ls -al`
- D. `ls -alR`

Answer: D

QUESTION 64:

What command would be used to move the contents of subdirectory bar into the current working directory?

- A. mv bar/* ..
- B. mv bar/ .
- C. mv bar/ ..
- D. mv bar/* .

Answer: D

QUESTION 65:

What is the correct way for a user to change the user's name in the password file?

- A. Edit the /etc/passwd file and change the user's name
- B. Type the passwd command
- C. Type the logname command followed by the user's name
- D. Type the passwd -f command

Answer: D

QUESTION 66:

Which of the following options describes the mv command?

- A. It can move only single files one at a time.
- B. It invokes the copy command with the -m option.
- C. It can move multiple files if its last argument is a directory.
- D. It makes intermediate copies of the data and renames the original file by deleting it and then recreating it.

Answer: C

QUESTION 67:

What is the Korn Shell variable PS1 used for?

- A. To specify the first process running
- B. To specify the shell's parent process
- C. To specify the priority setting of a korn shell
- D. To specify the string to be used as the primary system prompt

Answer: D

QUESTION 68:

Which command should be used to print a file named "color_file" to the print queue color using the System V printing subsystem?

- A. lp -c color color_file
- B. lp -d color color_file
- C. lp -o color color_file
- D. lp -t color color_file

Answer: B

QUESTION 69:

Which vi command is used to concatenate two sequential lines together?

- A. c
- B. C
- C. J
- D. :join

Answer: C

QUESTION 70:

What is the proper way to type an e-mail and send it after typing in the 'mail -s SUBJECT USER_NAME' command?

- A. Typing in the command vi
- B. Typing in the note command
- C. Typing a note ending with a Ctrl+d
- D. Specifying a file name where the note is stored

Answer: C

QUESTION 71:

Which command should be used to start a process named "long_proc" in the background if the user logs off before the process completes?

- A. long_proc
- B. long_proc &
- C. nohup long_proc
- D. nohup long_proc &

Answer: D

QUESTION 72:

What man command can be used to accomplish a keyword search of a string of characters "mkdir" as the final parameter?

- A. man -M mkdir
- B. catman -p mkdir
- C. man -k mkdir
- D. catman -M mkdir

Answer: C

QUESTION 73:

A user is trying to read a logfile that gets updated every minute. What is the correct command to view the new incoming messages in real time?

- A. more logfile
- B. cat -v logfile
- C. pg logfile
- D. tail -f logfile

Answer: D

QUESTION 74:

Which file, if present, is usually executed every time a user logs into an AIX system?

- A. /usr/profile
- B. /etc/.profile
- C. /home/profile
- D. \$HOME/.profile

Answer: D

QUESTION 75:

Which of the following vi commands would be used to change only the current character?

- A. R
- B. c
- C. cc
- D. r

Answer: D

QUESTION 76:

Which vi command is used to reverse the last action taken?

- A. r
- B. c
- C. u
- D. x

Answer: C

QUESTION 77:

What is the command to send 5 echo requests to a remote machine named hostname?

- A. ping -c 5 hostname
- B. traceroute -w 5 hostname
- C. ping -i 5 hostname
- D. traceroute -q 5 hostname

Answer: A

QUESTION 78:

Which of the following AIX commands should be used to rename a directory?

- A. mv
- B. cp
- C. mkdir
- D. rm

Answer: A

QUESTION 79:

Which command is used to show the filesystem space statistics for /tmp?

- A. ls /tmp
- B. du /tmp
- C. df /tmp
- D. fsck /tmp

Answer: C

QUESTION 80:

What is a valid format to remove a file named Machine*.\$CLUSTER.txt?

- A. rm Machine*."\$CLUSTER".txt
- B. rm "Machine*.\$CLUSTER.txt"
- C. rm 'Machine*.\$CLUSTER.txt'
- D. rm "Machine*.\$CLUSTER.txt"

Answer: C

QUESTION 81:

What is the function of the dot in the "find . -print" command?

- A. Searches a relative path
- B. Uses absolute paths for its search
- C. Restricts the search to two directory levels
- D. Starts the search from the parent directory

Answer: A

QUESTION 82:

The mydata file currently has permission bits set at 755. Which of the following commands will take away the execute permission from the group and others?

- A. chmod 655
- B. chmod go-x
- C. chmod uo-x
- D. chmod 554

Answer: B

QUESTION 83:

What System V print command can be used to determine the default print queue for the system?

- A. lpq
- B. qpri
- C. lpr
- D. qchk

Answer: A

QUESTION 84:

After a process has been suspended in the Korn shell, which command will restart the suspended process?

- A. fg
- B. reset
- C. enable
- D. restore

Answer: A

QUESTION 85:

The syntax for the "split" command in the online WEB based documentation displays: split [-l LineCount][[-a SuffixLength][File[Prefix]] In which section in the split documentation could more information about the "-l" option be found?

- A. Flags
- B. Purpose
- C. Description
- D. Implementation

Answer: A

QUESTION 86:

The following command is executed: cat /tmp/myfile > temp There is an error when the command is executed. Where will the error message of the command be placed?

- A. It will be sent to /dev/null.
- B. It will be sent to the system printer.
- C. It will be displayed on the terminal screen.
- D. It will be saved in the file temp created by the shell.

Answer: C

QUESTION 87:

What option for the ls command should be used to show the filetype when listing the contents of a directory?

- A. ls -F
- B. ls -l
- C. ls -R
- D. ls -c

Answer: A

QUESTION 88:

Which command will display all lines in file1 that contain either the string abc or the string xyz?

- A. `grep abc file 1 | grep xyz file 1`
- B. `grep -E "abc|xyz" file1`
- C. `grep [abc-xyz] file1`
- D. `grep ^[abc|xyz]$ file1`

Answer: B

QUESTION 89:

Which commands can be executed on one line without producing a syntax error?

- A. `cd; pwd`
- B. `TERM=lft; export TERM`
- C. `TERM=ibm3151, export term`
- D. `TERM=ibm3151: export TERM`

Answer: B

QUESTION 90:

Which of the following commands should be used to search for a \$ (dollar sign) only in file1?

- A. `grep "$" file1`
- B. `grep \$ file1`
- C. `grep -c $ file1`
- D. `grep $ file1`

Answer: B

QUESTION 91:

Which file name is the most appropriate for an AIX/UNIX file?

- A. Great Dane
- B. Yellow_lAb
- C. E*lk_Hound
- D. ;Ridge-Back

Answer: B

QUESTION 92:

Which command is used to rename a file?

- A. mv
- B. cp -r
- C. rm
- D. touch -r

Answer: A

QUESTION 93:

Which of the following commands should be used to create a directory named Test with permissions rwxr-xr-x in the current directory?

- A. mkdir -p 755 ./Test
- B. mkdir -m 755 Test
- C. mkdir -m u+x ~/Test
- D. mkdir -pm 755 test

Answer: B

QUESTION 94:

Which of the following commands could be used to log in to a remote machine?

- A. tsh
- B. tc
- C. tee
- D. tn

Answer: D

QUESTION 95:

Which vi command would be used to delete text from the current cursor position to the end of the line?

- A. dd
- B. db
- C. X
- D. d\$

Answer: D

QUESTION 96:

What should be done to make a shell script executable?

- A. Use the run command.
- B. Set the execute permission.
- C. Call it from another command or program.
- D. Use a shell script compiler to convert its text to an executable program.

Answer: B

QUESTION 97:

Which command line reads the data in file "newsstand" from standard input?

- A. mail newsstand
- B. grep Menu < newsstand
- C. wc myfile > newsstand
- D. ps -e | grep cc >> newsstand

Answer: B

QUESTION 98:

Which of the following is the vi editor command that delete the rest of the line after the cursor position while in command mode?

- A. r
- B. d
- C. \$d
- D. D

Answer: D

QUESTION 99:

AIX documentation Library Service allows HTML pages to be written and added to the library. Who has the authority to add these HTML pages to the Documentation Library?

- A. The adm user
- B. Any user that can write HTML
- C. The System Administrator
- D. The user who creates the HTML document

Answer: C

QUESTION 100:

What is displayed by the command `grep -v "^#" ?`

- A. All lines that begin with a ^
- B. All lines that begin with a ^ or #
- C. All lines that do not begin with a #
- D. Lines that do not begin with a # or ^

Answer: C

QUESTION 101:

Which of the following commands would display all of the current vi options?

- A. `more $HOME/.exrc`
- B. `:set all`
- C. `:set`
- D. `:set list`

Answer: B

QUESTION 102:

A user is logged on to an AIX system as the guest user and the guest home directory is `/guest`. When switching from the guest id to the user's normal id, which command will keep the user in `/tmp`?

- A. `cd`
- B. `cd /`
- C. `cd ..`
- D. `cd .`

Answer: D

QUESTION 103:

When using the `cp` command to copy files, which flag should be used to copy symbolic links, rather than copying files to which symbolic links point?

- A. `-l`
- B. `-h`
- C. `-f`

D. -p

Answer: B

QUESTION 104:

After executing the following: `chmod 777 dog` Which command would verify the results?

- A. `ls -d`
- B. `ls -a /`
- C. `ls -a dog`
- D. `ls -al dog`

Answer: D

QUESTION 105:

Which of the following will cancel all print jobs on the print queue named `ascii` for the user `guest_user`?

- A. `lprm ascii guest_user`
- B. `lprm guest`
- C. `lprm -P guest_user`
- D. `lprm -P ascii guest_user`

Answer: D

QUESTION 106:

Which `vi` command should be used to position the cursor at the end of the current line?

- A. `0`
- B. `a`
- C. `$`
- D. `e`

Answer: C

QUESTION 107:

Which command will display the type of terminal a Korn Shell is currently running on?

- A. `TERM=?`
- B. `man TERM`
- C. `echo TERM`
- D. `echo $TERM`

Answer: D

QUESTION 108:
