SECTION A

INTRODUCTION TO OPENTYPE®

WHAT IS OPENTYPE?

OpenType® is a cross-platform font file format developed jointly by Adobe and Microsoft. The two main benefits of the OpenType format are its cross-platform compatibility (the same font file works on Macintosh and Windows computers), and its ability to support widely expanded character sets and layout features, which provide rich linguistic support and advanced typographic control.

OpenType fonts can be installed and used alongside PostScript® Type 1 and TrueType fonts.

The range of supported layout features may differ in the various FontFont OpenType packages, therefore each OpenType package will be accompanied by this FF Info Guide listing the layout features supported by this specific font package.

You'll find a glossary of all available OpenType layout features in Section B of the general FF OpenType User Guide.

Please see the FontFont OpenType® User Guide
at <http://www.fontfont.com/opentype>

ABOUT FF KIEVIT OT BOOK

The initial work on Kievit occurred in 1995 as part of a school project and was finished several years later for a corporate client of Method Inc., a design firm in San Francisco. The openness of the characters and their proportions makes it an ideal typeface for use in small print. The clarity of classic sans serif faces (Frutiger and Univers) and the humanistic characteristics of old styles (Garamond and Granjon) were the inspiration for this contemporary design that is equally at home in a headline or a body of text. The FF Kievit family includes nine weights, true italics, old style figures and small caps – everything necessary for even the most demanding typography.

ABOUT MICHAEL ABBINK

Mike has been designing letter forms since 1992. His first completed typeface, FF Kievit, is used around the world, and has won awards from the ISTD and ATypI. Recently, through his work at Wolff Olins, he developed a custom typeface for GE (GE Inspira) that is an integral element of their new global branding program. Mike has also applied his love for letter forms to logotype designs for numerous corporate clients throughout his career. He continues to develop typefaces in his spare time, and plans to introduce a new typeface next spring. Mike earned two BFAs: one in Fine Arts, and one in Graphic Design and Packaging from Art Center in Pasadena. He then went to work for Meta Design San Francisco. Among his successes at Meta: designing retail environments for Nike, developing an award-winning IDEO website, and creating the identity for the Fuse98 design conference in San Francisco. In March 1999, Mike co-founded Method, Inc., a San Francisco-based web and graphic design firm. Acting as creative director, Mike developed or influenced identity and website programs for numerous clients, including Gucci, MoMA, Adobe and Autodesk. Mike then tried his hand at life on the client side. As an art director at Apple, he contributed to new packaging designs for the new Powerbooks, iSight, OSX Panther, AppleCare and the first G5. Shifting to a focus on corporate identity, he then led a company-wide identity evolution. Mike is currently a Design Director at Wolff Olins San Francisco, a branding consultancy. During his time at Wolff Olins, Mike has had the chance to create and produce new product programs for Knoll, develop print collateral for a global brand evolution of PwC, and apply his design skills to a variety of global brands.
