### **Introduction**

150+ Default Currencies. Most Flexible and Best-Ever Single & Multiple Currency Converters. Simple way to Update & Add Currencies value. Currency Conversion based on USD. You will love it.

### **Description**

Currency Converter contains both Single and Multiple Currency Converter based on USD. Currency Converter contains 150+ Default Currencies.

Single Currency Converter converts values of one currency to another selected currency. Multiple Currency Converter converts values of one currency to many other currencies. Currency Conversion based on USD.

Add any number of currency conversion. Attractive options for currency value updation and deletion. Indomitable Currency Conversion with Single and Multiple Currency. Professional User-Interface. A must for every Mobile phone user.

### **Single Currency Converter:**

Automatic calculation of currency rates according to the change in base & exchange currency, base value. Extremely easy user-interface.

Base and Exchange currencies are provided with their country and code.

## Multiple Currency Converters:

Automatic calculation of multiple currency rates according to the change in base currency & base value. Value of every other currency can be calculated and viewed in a single page. Report based presentation.

This powerful Currency Converter will convert more than one conversion at a time, in fact as many as you like.

Professionally and newly designed user-interface that speeds up Data Entry and Easy Viewing.

## **Requirements**

### **Desktop PC:**

**Processor:** PC with a Pentium II-class processor, 450 MHz or higher (Pentium III-class, 600 MHz recommended).

**Memory:** 256 MB RAM (recommended).

One of the following operating systems on your Desktop Computer:

MS Windows 95/98/Me, MS Windows 2000/2003, MS Windows XP.

### **Java Enabled Device:**

Device: Java Enabled Mobile Phone.

MIDlet-Info-URL: [www.infodevtech.com](http://www.infodevtech.com)

MIDlet-Jar-Size: 101239

MIDlet-Jar-URL: Currencyconverter.jar

MIDlet-Name: Currency Converter

MIDlet-Vendor: Infodev Technologies, Inc.

MIDlet-Version: 1.0

MicroEdition-Configuration: CLDC-1.0

MicroEdition-Profile: MIDP-2.0

**Memory: 102 KBytes of free memory space.**

**PC Synchronization software with cradle- provided by manufacturer.**

## **TO INSTALL / UNINSTALL:**

### **Installation Instructions**

Install the Currencyconverter.jar / Currencyconverter.jad into the mobile device using the PC sync software.

### **Uninstallation / De-Installation:**

Remove the Currencyconverter.jar from the mobile device using remove/uninstall option from the application menu.

### **GENERAL ISSUES**

- If the PC synchronization is failed, Please connect the cradle properly and try again.
- If a network card is inserted in the CF slot and the device is on battery power, the device will not shut off automatically after you, a reminder, or an alarm powers the device on. The device will remain on until it runs out of power, regardless of whether the network card is actually in use or not.

### **FAQs**

1. The downloaded program is not working properly.  
Please re-download the program using your Order/Purchase ID.
2. Program Setup is not running properly.  
Please uninstall the program and reinstall it.
3. Program installed properly, but unable to open.  
Please check the program, available in the device.

### **Updates & Fixes**

Infodev products are regularly updated, usually every **6-12** months. If you have problems or need new features, then make sure you check whether a new version is available at [www.infodevtech.com](http://www.infodevtech.com)
