

Soft & Wireless P800 Applications

(PLEASE READ THIS SOFTWARE LICENSE AGREEMENT CAREFULLY. BY DOWNLOADING, INSTALLING OR USING THE SOFTWARE YOU INDICATE ACCEPTANCE OF AND AGREE TO THE TERMS AND CONDITIONS OF THE AGREEMENT. IF YOU DO NOT AGREE TO THESE TERMS AND CONDITIONS, DO NOT DOWNLOAD, INSTALL OR USE THE SOFTWARE)

The P800 normally comes without any Arabic Font file system. The Arabic font file is required to allow viewing and typing of Arabic characters.

This Arabic font file is provided by Soft & Wireless in a P800 installation file called: **fontload.sis**

Instructions to Load Fontload.sis

- Connect your P800 to your computer via the provided desktop unit. Make sure you have installed the P800 application CD that comes with the phone and that P800 icon appears on your computer for connecting to your phone.
- Click on the provided fontload.sis and follow normal installation.
- The fontload.sis must be installed on your C Drive of the P800. It will not give you any option to install on your memory stick.
- You must have at least 600kb of free memory on your C Drive.
- If you already installed fontload.sis before, an error will show, abort the installation and no need to install fontload.sis.

- Once fontload.sis is installed. Restart your P800. (Switch it off and then back on).
- Please make sure you Switch off & on the phone while it is NOT connected to the charger. The P800 must be off the charger for it to properly switch off completely. Switch it back on then you can connect it again to the charger or to the desktop unit.
- Now fontload.sis is properly installed.
- If you use any Soft & Wireless P800 application that require Arabic font and you can not see any Arabic Font, then the fontload.sis was either not installed or the phone was not correctly switched off and it needs to be switched off without being on the charger for font system to load correctly.

Instructions to Load other Soft & Wireless P800 Applications

- Click on the application SIS once your P800 is correctly attached/connected to your computer.
- Follow normal instructions
- You can install the other applications on any drive you choose.
- If you get an error (or you are updating from older version of this application), please make sure the older installed application is closed (Exit from the application already installed) then continue (Retry) normal installation.
- No need to switch off/on the phone to use the application

Instructions to Load Soft & Wireless P800 License Files

If you have the application License SIS file provided by Soft & Wireless, please follow these instructions:

- Make sure fontload.sis is loaded and installed
- Make sure the Demo application is installed and closed (exit from the application menu)
- Make sure your P800 is connected and attached correctly to your computer
- Install the License file SIS file normally.
- USE THE SAME DRIVE YOU HAVE INSTALLED THE DEMO APPLICATION FOR THE SAME SIS FILE.
- For example, if you installed ArabicSMSDemo.sis on C Drive, then you purchased a license file for ArabicSMSDemo.sis then install the ArabicLicense.sis on your C Drive as well.
- Once the License file is installed, close the application (if it is still running) and open it again, it will check the License file and if correct license is installed then the complete registered version is operational and does not have any demo limitation.
