The Power of Knowing

Exam : 1Z0-200

Title : Oracle 11i E-Business Essentials

Ver : 11-07-2008

QUESTION 1:

Certkiller .com is implementing 11iOracle Applications. The company has two local administrators in separate locations. They need to ensure that only a relevant set of users is visible to each of these local administrators. Which action will meet the requirement?

- A. create a separate role for each local administrator
- B. specify user administration privileges in Oracle User Management
- C. use Data Security to provide relevant access to each local administrator
- D. use Function Security to provide relevant access to each local administrator

Answer: A

QUESTION 2:

Which tier(s) in Oracle E-Business Suite is responsible for storing application data?

- A. database tier only
- B. application tier only
- C. client (desktop) tier only
- D. both database tier and application tier

Answer: A

QUESTION 3:

Examine the given scenario :

- * X is a legal entity defined in a multilevel company structure.
- * There are three Operating Units A, B, and C rolled into it.
- * Paul, an assigned user of Oracle Payables, logs in from the Oracle Payables responsibility and is able to see information that is relevant to Operating unit A.
- * The MO:Operating Unit profile option has been set.

Which statements are true? (Choose all that apply.)

- A. All transactions created by Paul can be assigned to any of the Operating Units.
- B. All transactions created by Paul are automatically assigned to Operating Unit A.
- C. The profile option did not include Operating Unit A and Operating Unit B due to an error by the system administrator.
- D. The Oracle Payables responsibility is associated with an organization classified as Operating Unit A.
- E. The Oracle Payables responsibility is linked to the Operating Unit A by the MO: Operating Unit profile option.

Answer: B, D, E

QUESTION 4:

Identify the actions to be taken after defining a structure but before entering values.
(Choose all that apply.)

- A. Select the "Freeze Flexfield Definition" check box.
- B. Save your changes before freezing the flexfield definition.
- C. Do not save your changes before freezing the flexfield definition.
- D. Submit a request to build the structure view by selecting the "Compile" button.
- E. Submit a request to build the structure view before selecting the "Compile" button.

Answer: A, B, D

QUESTION 5:

Identify the true statements about a Balancing entity. (Choose all that apply.)

- A. Balance sheets are prepared for a balancing entity.
- B. A Legal Entity may comprise one or more than one balancing segments.
- C. Having multiple balancing entities within the same Operating Unit structure is not supported.
- D. It is represented as a balancing segment value in the accounting flexfield structure.
- E. 11iOracle Applications automatically secures balancing segment values within your chart of accounts with specific Legal Entities or Operating Units.

Answer: B, D

QUESTION 6:

Identify the true statements regarding flexfields in 11iOracle Applications. (Choose all that apply.)

- A. Flexfields are configurable fields.
- B. Flexfields consist of segments.
- C. Flexfields are available for all forms in 11iOracle Applications.
- D. Flexfields are used only in Oracle Financials suite of products.

Answer: B, D

QUESTION 7:

Certkiller .com decides to implement Oracle Receivables, Oracle Payables, and Oracle Purchasing. To access any of these applications, a user must be given access to a responsibility associated with which type of organization?

- A. a Legal Entity

- B. an Inventory Org
- C. an Operating Unit
- D. an Asset organization

Answer: C

QUESTION 8:

Identify three features of shared entities. (Choose three.)

- A. enable one-time definition of objects
- B. are referenced by several Oracle Application modules
- C. are defined in each Oracle Application module separately
- D. are owned by a single Oracle Application module for table purposes only
- E. are owned by a single Oracle Application module to designate the primary user or decision maker

Answer: A, B, D

Explanation: Shared Entities are not formally defined as such within any single products user's guide. You will find as you implement multiple products that the same entity is referenced by multiple products

QUESTION 9:

Can a menu be copied?

- A. no
- B. yes
- C. yes, by using System Administrator Responsibility
- D. yes, by using System Administration Responsibility

Answer: A

QUESTION 10:

The accounting flexfield of ABC Corp is: Company.Department.Account.Cost Center. Identify four correct statements.(Choose four.)

- A. Company is a segment in the combination.
- B. The account code combination is a key flexfield.
- C. The account code combination is identified by a structure.
- D. The account code combination is a key flexfield as well as a descriptive flexfield.
- E. Existing values for the accounting flexfield appear as a concatenated value having segment separators.
- F. The flexfield appears on your form as a two-character-wide text field with brackets [] as

its prompt.

Answer: A, B, D, E

QUESTION 11:

If a user profile option value were to be changed, when would the change take effect?
(Choose all that apply.)

- A. as soon as the user logs in
- B. as soon as the user changes responsibility
- C. when the Administration server is restarted
- D. after restarting the Conflict Resolution Manager
- E. as soon as the system administrator exits the instance

Answer: A

QUESTION 12:

Certkiller .com has many service requests and tasks that have not met customer requirements. Using CRM Application Foundation module, identify the component that helps Certkiller .com designate resources who will own and work on the task.

- A. Task Manager
- B. Resource Manager
- C. Escalation Manager
- D. Assignment Manager

Answer: D

QUESTION 13:

As a system administrator, you need to provide additional reporting and summarized information to some of your application users. How would you do this? (Choose all that apply.)

- A. by using Menus
- B. by using Exclusions
- C. by using Data Groups
- D. by using Request Groups

Answer: A, C, D

QUESTION 14:

Can a defined profile value be referenced anywhere in Oracle Applications?

- A. no
- B. yes
- C. yes, but only those profile values that are related to Application Object Library
- D. yes, but only those profile values that are related to Oracle Human Resources

Answer: B

QUESTION 15:

_____ enables you to register subscriptions for events that are significant to an 11iOracle Application instance.

- A. Event Activity
- B. Event Manager
- C. Workflow Manager
- D. Advanced Queues

Answer: B

QUESTION 16:

To run reports across organizations in a multi-org environment, the MO: Top Reporting Level profile option should be set at which level?

- A. Set of Books level only
- B. Operating Unit level only
- C. Legal Entity level or Set of Books level
- D. both Operating Unit and Legal Entity levels
- E. both Legal Entity and Set of Books levels

Answer: C

QUESTION 17:

Certkiller .com is in the business of manufacturing cosmetics. It obtains and pays for raw materials. Which business flow in Oracle E-Business Suite would map to the above activities?

- A. Order to Cash
- B. Procure to Pay
- C. Forecast to Plan
- D. Demand to Build
- E. Contract to Renewal

Answer: D

Explanation:

Procure to Pay, since in other options making payments are not covered

Demand to Build

Advanced Supply Chain Planning (ASCP)/Material Requirements Planning (MRP)

Create constraint-based or optimized plans, create requisitions (purchase or internal) to replenish Inventory

Cost Management

Supply cost information for optimized planning

WIP

Use discrete, project, repetitive, assemble-to-order, work order-less, or a combination of manufacturing methods. Inquiries and reports give you a complete picture of transactions, materials, resources, costs, and job and schedule progress.

Capacity

Calculate your capacity load ratio by resource or production line. Ensure that you have sufficient capacity to meet your production requirements.

BOM

Store lists of items that are associated with a parent item and information about how each item is related to its parent

QUESTION 18:

Which two statements are true regarding ownership of shared entities? (Choose two.)

- A. Customers is owned by Oracle Human Resources; Locations is owned by Oracle Receivables.
- B. Items is owned by Oracle Purchasing; Locations is owned by Oracle Receivables.
- C. Sales Force is owned by Oracle Order Management; Employees is owned by Oracle Human Resources.
- D. Set of books is owned by Oracle General Ledger; Locations is owned by Oracle Human Resources.
- E. Suppliers is owned by Oracle Purchasing; Units of Measure is owned by Oracle Inventory.

Answer: D, E

QUESTION 19:

Certkiller .com has set up the Asset Category key flexfield. It has also set up a descriptive flexfield to store vehicle information associated with the asset category "Vehicle."

Identify two correct statements. (Choose two.)

- A. The setting up of the descriptive flexfield is mandatory.
- B. The Asset Category flexfield is owned by the Oracle Assets module.
- C. The descriptive flexfield is associated with tables in the Oracle Assets module.
- D. Only the Asset Category flexfield is associated with tables in the Oracle Assets module.

Answer: B, C

Explanation: While most Oracle Applications products require that you set up particular key flexfields, many descriptive flexfields are optional.

QUESTION 20:

Identify two features related to parameters in a Daily Business Intelligence Report. (Choose two.)

- A. They are based on responsibilities.
- B. Each page in a report contains common parameters.
- C. Parameters can be defined for individual regions of a report.
- D. Multiple primary dimension parameters can be associated with a page in a report.
- E. The Primary Dimension parameter is different for each page in a Daily Business Intelligence report.

Answer: A, E

QUESTION 21:

Identify two features of Oracle Workflow. (Choose two.)

- A. enhances data security
- B. makes you focus on managing individual business transactions
- C. each activity can be a PL/SQL function or a notification or a subprocess
- D. can integrate business functions only between business processes within a single company
- E. can integrate business processes within an enterprise as well as between different organizations and different systems

Answer: C, E

QUESTION 22:

Identify two features of the "None" value set. (Choose two.)

- A. It has an approved list of values associated with it.
- B. The entered value must meet the formatting requirements.
- C. The flexfield value security rules cannot be used for a segment that uses this value set.
- D. Users can enter any value that they want even if it does not meet formatting requirements.

Answer: C, D

Explanation: A none value set has NO list of approved values associated with it.

QUESTION 23:

Identify three correct statements regarding Oracle E-Business Suite. (Choose three.)

- A. It can run entirely on the Internet.
- B. A minimum of two modules need to be implemented for an organization.
- C. It is engineered to work as an integrated system on a single IT infrastructure.
- D. It supports multi-directional flows of business information within an organization.

Answer: A, C, D

QUESTION 24:

Certkiller .com is installing 11iOracleApplications on two nodes: A and B. On Node A, it has installed the Forms server, Web server, and Administration server. On Node B, it has installed the Concurrent Processing server. By default, on which node would the Reports server be installed?

- A. Node A
- B. Node B
- C. neither of the nodes
- D. both Node A and Node B

Answer: B

QUESTION 25:

Which three statements are correct regarding the Oracle Workflow engine? (Choose three.)

- A. generates a history of the items
- B. is embedded in the Oracle database
- C. is embedded in Oracle Application Server
- D. maintains the state information for a workflow item
- E. is dependent on the Business Event System for its functioning
- F. interacts with the Notification System through the Workflow Definitions Loader

Answer: A, B, D

Explanation: The workflow engine is a set of tables and PL/SQL stored procedures that manages the execution of a workflow process and tracks work in process. It maintains the state information of a workflow item and generates a complete history

for the item (including an audit trail). It executes workflow rules and functions (PL/SQL stored procedures) automatically

QUESTION 26:

An activity in a workflow process can be a _____.

- A. notification and a subprocess but not a PL/SQL function
- B. subprocess and a PL/SQL function but not a notification
- C. PL/SQL function and a notification but not a subprocess
- D. PL/SQL function, a notification, a subprocess, or a business event

Answer: D

QUESTION 27:

Identify two considerations for determining the size of a value set. (Choose two.)

- A. Your value set size must be less than the size of the underlying segment column in the flexfield table.
- B. Your value set size must be less than or equal to the size of the underlying segment column in the flexfield table.
- C. Oracle Applications enables you to assign a value set whose values do not fit into the flexfield table.
- D. Choosing the maximum size for your value set depends on which flexfield you plan to use with your value set.
- E. The maximum size for your value set can be selected independently from which flexfield you plan to use with it.

Answer: B, D

QUESTION 28:

Exhibit:

1. Perform setups unique to each operating unit.
2. Define organization structure.
3. Convert to multi-org.

From the steps mentioned in the exhibit, identify the correct sequence for enabling multi-org:

- A. 2,3,1
- B. 1,3,2
- C. 3,2,1
- D. 2,1,3

Answer: A

Explanation:

A (Controlled by oracle documentation: Basic Steps to Enable Multi-Org : Define organization structure Convert to Multi-Org Perform setups unique to each operating unit (ie. Financials options, customer address setup, supplier site setup, bank accounts))

QUESTION 29:

How are code combinations of a key flexfield stored? (Choose all that apply.)

- A. There is one column for every key flexfield segment.
- B. One column can store more than one key flexfield segment.
- C. They are stored in a database table called a code combinations table.
- D. The unique ID column functions as the nonprimary key for the code combinations table.
- E. Each unique combination of segment values is identified by a unique ID value stored in a unique ID column.

Answer: A, C, E

QUESTION 30:

Identify four features of Workflow Monitor. (Choose four.)

- A. enables users to view their own workflows
- B. enables you to modify a workflow definition file
- C. enables you to download a workflow definition file
- D. displays status information for the process instance
- E. enables administrators to perform control operations
- F. enables you to search for a workflow process instance
- G. provides only summary-level information about individual activities of a workflow process

Answer: A, D, E, F

QUESTION 31:

Which statement is true regarding Permanent Persistence values in Workflow purging?

- A. Items are deleted inndays.
- B. Incomplete activites are deleted.
- C. Items are deleted only when forced.
- D. Items with open notifications are deleted.

Answer: C

QUESTION 32:

Certkiller .com has shipped goods against purchase orders to Certkiller .com. Certkiller .com now has to pay for the goods received, and also account for and reconcile the transaction. Which are the 11i Oracle Application modules involved in these activities for Certkiller .com? (Choose all that apply.)

- A. Payables
- B. Purchasing
- C. Order Management
- D. General Ledger
- E. Cash Management

Answer: C, D, E

Explanation: GL is base component for a financial based transaction.

QUESTION 33:

Identify two required components of a responsibility. (Choose two.)

- A. menu
- B. function
- C. exclusions
- D. data group
- E. request group

Answer: A, D

QUESTION 34:

Identify the organization classification that is a segment value in the Accounting flexfield structure.

- A. Legal Entity
- B. Set of Books
- C. Operating Unit
- D. Balancing Entity

Answer: D

QUESTION 35:

_____ is a specified condition found during an alert check.

- A. Action

- B. Action Set
- C. Exception
- D. Response Set

Answer: C

QUESTION 36:

Certkiller .com has implemented Oracle Manufacturing applications. How is the data in these applications partitioned?

- A. by Application
- B. by Legal Entity
- C. by Operating Unit
- D. by Business Group
- E. by Inventory Organization

Answer: E

QUESTION 37:

Identify three features of a value set. (Choose three.)

- A. Value sets are mandatory.
- B. Value sets must contain a list of values.
- C. The same value set can be shared between different flexfields.
- D. Value sets control the values for many of the report parameters.
- E. A value set is a definition of the values approved for entry by a particular flexfield segment.

Answer: C, D, E

QUESTION 38:

Can you create an application user with start and end dates that are earlier than the current date?

- A. Yes, the login can be created, but it will not work.
- B. Yes, the login can be created, but it will work only once.
- C. No, the login cannot be created with start and end dates that are earlier than the current date.
- D. Yes, the login can be created, but only if the System Administrator responsibility is assigned to the user.

Answer: A

QUESTION 39:

Identify two descriptive flexfield components whose values are used to determine contexts. (Choose two.)

- A. Context field
- B. Global segment
- C. The Reference field
- D .Context-sentive segments

Answer: A, C

Explanation:

Descriptive Flexfield Components

- **Global segment** — Displays information common to all contexts
- **Context-sensitive segment** — Displays information appropriate only to a particular context
- **Reference field** — A field on the application window whose value is used to determine contexts
- **Context field** — A field in the structure whose value is used to determine contexts

QUESTION 40:

Certkiller .com is running on 11i Oracle Applications and wants to ensure that supply records of one supplier are not visible to another supplier. Which action will meet the requirement?

- A. by securing attributes for each supplier
- B. by excluding attributes for individual suppliers
- C. by assigning the same attribute value forVENDOR_CONTACT_ID
- D. by assigning a separate attribute value forINTERNAL_CONTACT_ID

Answer: C

QUESTION 41:

Identify two correct options regarding subscription processing. (Choose two.)

- A. Processes user response
- B. Processes function activities
- C. passes information to Notification Mailer
- D. sends event information to a workflow process
- E. include the task of executing custom code on the event information

Answer: D, E

QUESTION 42:

Which statements are true about a table-validated value set? (Choose all that apply.)

- A. A table-validated value set has no list of approved values associated with it.
- B. The values in a table-validated value set are stored in Oracle Application Object Library's tables.
- C. Table-validated value sets obtain their lists of approved values from existing application tables.
- D. In a table-validated value set, you need to enter each value manually using the Segment Values window.
- E. A table-validated value set enables you to use your own application tables as value sets for flexfield segments.

Answer: A, C, E

QUESTION 43:

In order for organizations to post to the same set of books, at a minimum they must share the same _____.

- A. Calendar
- B. functional currency
- C. accounting flexfield structure
- D. functional currency and calendar
- E. accounting flexfield structure and calendar
- F. functional currency and accounting flexfield structure
- G. functional currency, accounting flexfield structure and calendar

Answer: C

Explanation: Those key flexfields that allow multiple structures may use different mechanisms to determine which structure a user sees. For example, the Accounting Flexfield uses multiple structures if you have multiple sets of books with differing charts of accounts. Your forms determine which Accounting Flexfield structure to display by

using the value of the GL_SET_OF_BOOKS_ID profile option associated with your current responsibility

QUESTION 44:

Identify three features of key flexfields. (Choose three.)

- A. They are used as identifiers for entities.
- B. The structure is comprised of segments.
- C. They appear as a single-space field enclosed by brackets.
- D. A key flexfield structure consists of multiple code combinations.
- E. Each segment of a key flexfield will usually contain meaningful information

Answer: A, B, E

QUESTION 45:

Certkiller .com wants to track and analyze call volumes in its enterprise call centers. Which Daily Business Intelligence product can help achieve this objective?

- A. Sales Intelligence
- B. Quoting Intelligence
- C. Interaction Center Intelligence
- D. Service Contracts Intelligence

Answer: C

Explanation: Daily Interaction center Intelligence Email Center Management Inbound Telephony Management

QUESTION 46:

Which three options are determined by a responsibility in Oracle Applications? (Choose three.)

- A. Inherited Roles
- B. Accessible Reports
- C. Accessible Applications
- D. Associated Set of Books
- E. Accessible Menus and Forms

Answer: C, D, E

QUESTION 47:

Identify three statements that are true regarding functions and menus. (Choose three.)

- A. Functions can be excluded at any level.
- B. Excluding a menu excludes all its child functions.
- C. Excluding a menu does not exclude the functions nested in that menu.
- D. Excluding a menu excludes all the functions and menus nested in that menu.
- E. Excluding a function does not exclude all occurrences of that function from the responsibility's menu structure.

Answer: A, B, D

QUESTION 48:

Identify three types of regions in Daily Business Intelligence from the list below.
(Choose three.)

- A. link
- B. folder
- C. report
- D. menu
- E. parameter
- F. key performance indicator

Answer: A, E, F

Explanation:

Region: A region is a container for a unique set of information on an dashboard. There are five different types of regions in Daily Business Intelligence: table, graph, parameter, KPI, and links.

QUESTION 49:

Identify three features of a Global segment. (Choose three.)

- A. It is implemented in key flexfields.
- B. It is implemented in descriptive flexfields.
- C. It uses the same column for all rows in the table.
- D. It uses different columns for each row in the table.
- E. It is a segment that always appears regardless of the context.
- F. It is a segment that may or may not appear, depending on the context.

Answer: B, C, E

QUESTION 50:

Which two statements are true about the interaction between the Notification System and the Workflow Engine? (Choose two.)

- A. The Notification System relays user responses back to the Workflow Engine.
- B. The Notification System communicates the event raised by the Business Event System to the Workflow Engine.
- C. The Workflow Engine sends information to the Notification Mailer program, and then informs the Notification System about this communication.
- D. The Workflow Engine informs the Notification System to deliver notifications to a user if an activity requires human intervention.
- E. The Notification System informs the Workflow Engine about the user to whom the notification needs to be sent.

Answer: C, D

QUESTION 51:

Identify two prerequisites for viewing notifications through Oracle Workflow Web pages. (Choose two.)

- A. The Business Event System should be configured.
- B. The Oracle Workflow Manager should be configured.
- C. Your Notification Mailer must be configured for UNIX sendmail.
- D. You must have a Web browser that supports frames and JavaScript.
- E. Oracle HTTP Server should be installed as the Web server for workflow.

Answer: D, E

QUESTION 52:

What would happen if you try saving an existing menu under a different name?

- A. There will be two menus.
- B. The original menu is disabled.
- C. The new menu will not contain any functions.
- D. The new menu will overwrite the original menu.

Answer: D

QUESTION 53:

Identify the true statement(s) about the features of Multi-Org. (Choose all that apply.)

- A. The data can be logically partitioned.
- B. Users can be assigned to specific organizations.
- C. It defines organizations and the relationships between them.
- D. Multiple installations of Oracle Application products are needed.
- E. It enables at most two business units to use a single installation of Oracle Applications.

Answer: A, B, C, E

QUESTION 54:

Identify four business process integration requirements that can be addressed by Oracle Workflow. (Choose four.)

- A. synchronous messaging
- B. point-to-point system integration
- C. system integration messaging hub
- D. distributed applications messaging
- E. business event-based workflow processes

Answer: B, C, D, E

QUESTION 55:

Identify three features of Oracle Workflow builder. (Choose three.)

- A. monitors workflows
- B. runs on Linux platform
- C. saves workflow definition as a flat file
- D. defines and customizes workflow definitions
- E. has Navigator tree and Process diagram as its components

Answer: C, D, E

QUESTION 56:

Which option describes a group of segments?

- A. values
- B. value set
- C. flexfield structure
- D. both structure and values

Answer: C

QUESTION 57:

As a system administrator, you have to set a profile option specific to an operating unit. Which Profile Hierarchy Level would you choose?

- A. Site Level
- B. User Level

- C. Application Level
- D. Organization Level

Answer: D

QUESTION 58:

Which three tasks do alerts perform? (Choose three.)

- A. send an e-mail message
- B. submit a concurrent request
- C. run an operating system script
- D. monitor concurrent managers
- E. run SQL scripts but not operating system scripts

Answer: A, B, C

QUESTION 59:

Identify three features of Daily Business Intelligence. (Choose three.)

- A. provides a cross-enterprise reporting capability
- B. requires a data warehouse setup for its implementation
- C. creates a separate subset of transactions in a new database
- D. is based on a single, transactional database for all products and customers
- E. provides planning, execution, and reporting capabilities to optimize business performance

Answer: A, D, E

QUESTION 60:

A _____ is a container for a unique set of information on an Daily Business Intelligence overview page.

- A. report
- B. region
- C. dashboard
- D. key performance indicator

Answer: B

Explanation:

Region: A region is a container for a unique set of information on an dashboard. There are five different types of regions in Daily Business Intelligence: table, graph, parameter, KPI, and links.

Reports: You can drill to a report from any linked value in a dashboard. In general, reports

contain detailed information on one or more KPIs. Reports contain graphs and a table region and they contain more parameters than a dashboard. Reports do not contain truncated values. You can drill from some reports directly into the transactional system.

KPI: A KPI is a strategic business factor used for reporting. KPIs are designed for comparing and judging performance on strategic business factors such as Revenue or Operating Margin. Each dashboard contains a set of KPIs that the content of the dashboard is based on. For example, the Revenue and Expenses KPIs serve as the basis for the Revenue and Expense regions and reports.

Dashboard: A dashboard is a collection of content that is designed to meet the needs of a particular responsibility. Dashboards contain parameters, regions, and Key Performance Indicators (KPIs)

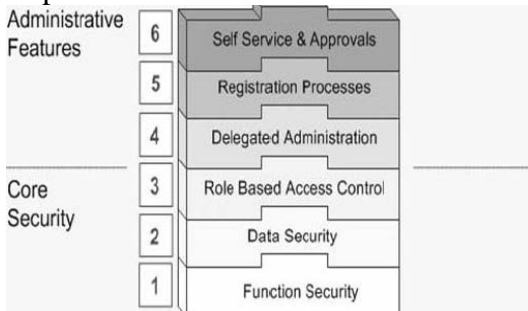

QUESTION 61:

At which level can you exclude a function from a responsibility?

- A. Menu level, submenu level or function level
- B. Menu level and submenu level but not function level
- C. Menu level and function level but not submenu level
- D. Function level and submenu level but not menu level

Answer: A

Explanation:

QUESTION 62:

Identify the correct sequence of Oracle Application Security layers from bottom to top.

- A. Function Security, Data Security, and Role Based Access Control
- B. Role Based Access Control, Data Security, and Function Security
- C. Data Security, Function Security, and Role Based Access Control
- D. Function Security, Role Based Access Control, and Data Security

Answer: A

QUESTION 63:

Which two statements are true about Oracle Workflow and/or Oracle Alerts? (Choose two.)

- A. Workflow can support complex conditional logic.
- B. Alerts can be configured for any frequency of occurrence.
- C. Workflows can wait for a user response during an activity.
- D. Alerts run only when a database record is either updated or created.
- E. Alerts can wait for a user response either through email or through a Web page.

Answer: A, E

QUESTION 64:

Identify three correct statements regarding Securing Attributes. (Choose three.)

- A. is defined at the responsibility level
- B. specifies access to database rows
- C. hides specific database column from users
- D. a responsibility can be assigned to only one securing attribute
- E. specifies the database column which the security would be based on in a Web inquiry

Answer: A, B, E

Explanation:

You may assign any number of securing attributes to the responsibility. Securing attributes are used by Oracle HTML-based applications to allow rows (records) of data to be visible to specified users or responsibilities based on the specific data (attribute values) contained in the row.
