The Power of Knowing

Exam : 190-720

Title : IBM Lotus Notes Domino 7 SysAdmin  
Operating Fundamentals

Ver : 11.27.08

---

**QUESTION 1:**

Your Organizational certifier is named Certkiller . Each city in your company has an Organizational Unit certifier from the Certkiller certifier that references the city. Susan wants to create an Organizational Unit certifier below the city Organizational Unit certifier. Which one of the following must she have to accomplish this?

- A. Reader access to the domain's directory
- B. A copy of the Certkiller Organizational certifier
- C. A copy of the city's Organizational Unit certifier
- D. Copies of both the Certkiller Organizational certifier and the location's Organizational Unit certifier

Answer: C

---

**QUESTION 2:**

While setting up a new Domino server, Jamie is presented with a list of ports available for Domino. Where is this list of available ports taken from?

- A. The current operating system configuration
- B. The current list of DNS names the host is known by
- C. The current list of assigned IP addresses on the machine
- D. The current list of host names found on the operating system

Answer: A

---

**QUESTION 3:**

What is the lowest level of rights in the Domino Directory ACL that allows the creation of groups?

- A. Author with the Group Creator role
- B. Editor with the Group Manager role
- C. Designer with the Group Maintainer role
- D. Reader with the Group Administrator role

Answer: A

---

**QUESTION 4:**

Why did Tim designate Server1/Boise/ Certkiller as the Administration Server for the Domino Directory?

- A. To make sure that all new users were registered on Server1/Boise/ Certkiller .

- B. To prevent users from making changes to the Domino Directory on Server1/Boise/ Certkiller
- C. To force administrators to make all changes to the Domino Directory on Server1/Boise/ Certkiller .
- D. To ensure that the Administration Process would process all Domino Directory changes on Server1/Boise/ Certkiller .

Answer: D

---

**QUESTION 5:**

Recovery information has been configured for the Organizational Unit certifier Packaging. The administrator has selected 8 administrators that can process recovery information, but 3 are required to unlock any certified with the Packaging certifier. What three administrators in the list must be utilized?

- A. Any three administrators
- B. The last three administrators
- C. The first three administrators
- D. Any consecutive three administrators

Answer: A

---

**QUESTION 6:**

Tisha has received an encrypted mail message while in Domino Web Access. Which of the following will Tisha be forced to do to view this message?

- A. She will be forced over to HTTPS automatically
- B. She will be forced to log out and log back in over TLS
- C. She will be forced to use her Notes client to read the email
- D. She will be forced to have the message unencrypted by the server and will see the message after it has been processed

Answer: A

---

**QUESTION 7:**

The server Web1/XYZ defaults to Server document settings to obtain configuration information for Internet protocols when which of the following features is not enabled?

- A. Internet Site documents
- B. Global Domain documents
- C. Single Sign-on documents
- D. Web Configuration documents

Answer: A

---

**QUESTION 8:**

You have made the following entry in the server's notes.ini file

Allow\_Access\_lan7=\* (\$Groups)

Which of the following will this entry provide?

- A. Every group in the Domino Directory will be allowed access over lan7
- B. Everyone in the Domino Directory that cannot be found in a group can access the server over lan7
- C. Every group in the Domino Directory will be denied access to all other ports on the Domino server
- D. No one in the Domino Directory will be able to access lan7 unless you first access another port and authenticate as part of a group

Answer: A

---

**QUESTION 9:**

Alan has specified multiple Notes network ports available to TCP/IP on the Domino server. By default, all TCP/IP-based services on a Domino server listen for network connections on all NICs and on all configured IP addresses on the server. How does Alan configure Domino to listen to a specific address?

- A. Bind a port to a specific address in the notes.ini
- B. Disable all network cards except for the card with the IP address desired
- C. Configure the physical server to assign all IP addresses to one network card
- D. Enter specific addresses into Domino IP configuration documents in the Domino Directory

Answer: A

---

**QUESTION 10:**

Where does the Domino Server Setup program store the certifier ID file by default?

- A. In the Domino Name and Address Book
- B. In any network drive location that you specify during installation
- C. In the directory you specify as the Domino data directory during installation
- D. On the Domino Administrator's local machine in My Documents\Lotus\Certifiers directory

Answer: C

---

**QUESTION 11:**

Melinda wishes to deploy LDAP access to the Domino directory. However, she wishes to restrict the fields available to anonymous users. In what document are the fields selected that will be available to anonymous access?

- A. LDAP Site document
- B. Internet Site document
- C. LDAP configuration document
- D. Server configuration document

Answer: D

---

**QUESTION 12:**

A Domino domain is a group of Domino servers that share the same which of the following?

- A. Physical LAN
- B. Domino Directory
- C. Network Protocol
- D. Organization certifier

Answer: B

---

**QUESTION 13:**

While installing the first Domino server, Alan is presented with a list of Internet services. Which of the following are selections for Alan under Internet services?

- A. Database Replicator, Ports, and Web Interfaces
- B. Directory engines, Schedule Management, and Billing
- C. Web browsers, Internet Mail clients, and Directory services
- D. Protocols, Domino Enterprise Connection Services, and Web Statistics

Answer: C

---

**QUESTION 14:**

What two canonical name components are required when registering new users?

- A. Common name and country
- B. Organization and country
- C. Common name and organization
- D. Organizational unit and organization

Answer: C

---

**QUESTION 15:**

A Configuration Directory utilizes a primary Domino Directory for which of the following?

- A. To negotiate replication settings and obtain the administrative server requests
- B. To obtain information on Person, Group, Mail-In Database, and Resource documents
- C. To obtain information on connection, program, schedule, and certificate documents
- D. To allow remote users to passthru to internal Domino servers as defined in the Configuration Directory

Answer: B

---

**QUESTION 16:**

The Certification log records information related to which of the following?

- A. Certification, recertification, and name changes
- B. DOLS certificates, SSL key expirations and Internet sites
- C. Recertification, self-signed certificates, and SSL key expirations
- D. Group membership, self-signed certificates, and S/MIME certificates

Answer: A

---

**QUESTION 17:**

During the Domino server installation, Mark is presented with an option asking what type of Domino server he wishes to install. Which of the following installs a Domino server that provides both messaging and application services, with support for Domino clusters?

- A. Domino Utility Server
- B. Domino Messaging Server
- C. Domino Clustered Server
- D. Domino Enterprise Server

Answer: D

---

**QUESTION 18:**

Where does Domino query to determine what addresses are part of the local Internet domain for SMTP mail?

- A. The server document

- B. The Global Domain document
- C. The SMTP connection document
- D. The Foreign SMTP domain document

Answer: B

---

**QUESTION 19:**

A Notes Named Network (NNN) is a group of servers that meet which of the following requirements?

- A. Servers that have FQDN's that end in the same domain
- B. Servers that are placed in the same group in the Domino Directory
- C. They can connect to each other directly through a common LAN protocol and network pathway
- D. They can reach each other via dial-up connections when they do not run the same protocols

Answer: C

---

**QUESTION 20:**

Which server console command adds or changes a setting in the NOTES.INI file?

- A. Load update
- B. Enter change
- C. Set Configuration
- D. Update notes variable

Answer: C

---

**QUESTION 21:**

Domino has the ability to route mail in which of the following two default protocols?

- A. MIME and S/MIME
- B. POP3 and IMAP
- C. LDAP and HTTP
- D. NRPC and SMTP

Answer: D

---

**QUESTION 22:**

Martha, a Domino user, is sending an email to a person not found in the Domino Directory. In what message format will the router send the message?

- A. The format will always be in MIME
- B. The format will always be in SMTP
- C. The format will always be in Notes Rich Text
- D. The format will be decided by the type of address being sent to

Answer: D

---

**QUESTION 23:**

Server4 and Server7 are both in the XYZ domain but are in separate Domino Network Names. How many connection documents are required for mail to route from Server4 to Server7 and from Server7 to Server4?

- A. 1
- B. 2
- C. 3
- D. None

Answer: B

---

**QUESTION 24:**

When a recipient's mail file is not on the local server, but is in the Domino domain, Domino calculates how to route the message to the recipient's server and whether to use SMTP or Notes routing (NRPC). What is the next determination of how the message is routed?

- A. Whether or not user's mailfile is running the same Domino version as the sender determines how the message is routed
- B. The configuration of the local server and the message format determines how Domino moves the message to the server
- C. If the local server can send SMTP within the local Internet domain and the home mail server can receive SMTP, the Router uses SMTP to send the message
- D. The configuration of the SMTP task to allow relays on the destination server is read from the Domino Directory. If relays are allowed the message is sent NRPC

Answer: B

---

**QUESTION 25:**

POP3 and IMAP use which of the following for user authentication?

- A. A Notes ID file
- B. Single sign-on (SSO)
- C. Public and private keys

D. Username and Internet password

Answer: D

---

**QUESTION 26:**

LDAP stands for which of the following?

- A. Local Domino Access Parameter
- B. Local Directory Access Protection
- C. Lightweight Domino Access Protocol
- D. Lightweight Directory Access Protocol

Answer: D

---

**QUESTION 27:**

Where can you view server statistics in the Domino Administrator client?

- A. Server tab > Statistics tab
- B. Statistics tab > Server tab
- C. Domino tab > Server Statistics tab
- D. Server Statistics tab > Domino tab

Answer: A

---

**QUESTION 28:**

Josh wants to establish the interval for polling servers from his Domino Administrator client. Where does he configure this interval?

- A. File > Tools > Preferences
- B. Tools > Administration > Configuration
- C. Administration > Monitoring > Polling Interval
- D. File > Preferences > Administration Preferences

Answer: D

---

**QUESTION 29:**

The purpose of the RnRMgr task is which of the following?

- A. Create an individual document for each mail user in the new RnRBusytime database with busytime marked
- B. Watch for reservation requests in an R&R database and to process them in the order in which they arrive or were created

- C. Scan all the mail users, rooms and resources in the domain and populate the busytime database with the freetime for each one
- D. Obtain a list of all rooms and resources across the local and foreign domains and consolidate the freetime into a single busytime database on a daily basis

Answer: B

---

**QUESTION 30:**

Which of the following server tasks examines all documents in a database to find and update Readers and Authors fields, by default?

- A. Updall
- B. Catalog
- C. Agent Manager
- D. Administration Process

Answer: D

---

**QUESTION 31:**

Who can run a personal agent?

- A. Database Administrators
- B. The server where the agent exists
- C. Any user who has access to the agent
- D. Only the person who created the agent

Answer: D

---

**QUESTION 32:**

If there is no entry in the replication history of a database, if access rights have changed, or if the selective replication settings have changed, the Replicator performs what function next?

- A. It has to search all documents in the source database, not just those that have changed since the last replication
- B. It has to search all deleted documents from the destination database, not just those that have changed since the last replication
- C. It has to verify if the connection is from a Notes client or Domino server. If the connection is from a Notes client it will immediately begin a pull and overwrite any server data
- D. It has to open a connection to the Administration Server for the database to inquire if scheduled replication is authorized

Answer: A

---

**QUESTION 33:**

Restrictions can be configured in Adjacent domain documents and Configuration Settings documents. Domino will default to which?

- A. Adjacent
- B. The most restrictive
- C. Configuration Settings
- D. It will ignore duplicate fields

Answer: B

---

**QUESTION 34:**

Rob runs the task UPDALL with the -R argument on his server. What will this accomplish?

- A. It rebuilds indices in all views in all databases on the server.
- B. It discards damaged indices in all views in all databases on the server.
- C. It deletes all indices so that they can be recreated when users access them.
- D. It removes unused space from indices in all views in all databases on the server.

Answer: A

---

**QUESTION 35:**

Barbara wants to restrict a group of people to be able to issue informational server commands only. In which field in the server document should she list the group name?

- A. View-only Administrators
- B. System Administrators
- C. Console Administrators
- D. Restricted Administrators

Answer: A

---

**QUESTION 36:**

The Access Control List right of 'Delete Documents' is an option for which of the following?

- A. Author
- B. Editor

- C. Manager
- D. All of the above

Answer: D

---

**QUESTION 37:**

As the administrator, you wish to restrict access with Notes id files to all servers in the domain for particular users. Which of the following steps is the best way to accomplish this?

- A. From the Notes client, send an email from the Administrator account with a button that will disable the Notes id file when clicked
- B. Visit each user workstation, enter the password recovery information for their id file and change their Notes id password to a new one unknown to them
- C. From the Domino Administrator select the Person documents of users to whom you want to deny access. Choose Actions - Set Password Fields. In the "Check Notes password" field, select Lockout ID
- D. From the Domino Administrator select a Deny Access group for the users you wish to deny access. Choose Administration - Set Lockout. In the "Lockout time" field, select the value zero to permanently lock the users out

Answer: C

---

**QUESTION 38:**

A database designer can assign special access to database design elements and database functions by creating which of the following?

- A. Roles
- B. Entries
- C. Programs
- D. Sections

Answer: A

---

**QUESTION 39:**

You have noticed that the server document field "Create databases and templates" is blank. What rights are assigned for this value to users who can access the server?

- A. No users can create databases on the server
- B. All users can create databases on the server
- C. No users may access any template with anonymous access set to None
- D. All users have automatic editor rights to all databases and templates on the server

Answer: B

---

**QUESTION 40:**

Which of the following fields grants the highest level of agent access on the server?

- A. Run restricted LotusScript/Java agents
- B. Run unrestricted methods and operations
- C. Run restricted Simple and Formula agents
- D. Run unrestricted LotusScript/operating commands

Answer: B

---

**QUESTION 41:**

Which of the following sample passwords would be the most complex in the password quality scale?

- A. kltrbwov
- B. 5521nowONu
- C. tobeworking
- D. lakestreampondriverocean

Answer: D

---

**QUESTION 42:**

Roles are specific to which of the following?

- A. The domain for which they were created
- B. The database for which they were created
- C. The server task to which they are assigned
- D. The server for which they are assigned to run on

Answer: B

---

**QUESTION 43:**

A user is attempting to send an encrypted mail message to another user on the same Domino system. Which of the following is utilized to encrypt the message?

- A. The sender's public key
- B. The sender's private key
- C. The recipient's public key
- D. The recipient's private key

Answer: C

---

**QUESTION 44:**

Todd, the Domino administrator, is attempting to use the server ID to access a database from a workstation. However, he is receiving an error while attempting to access the database. Which of the following is most likely the cause of this error?

- A. A server ID may not be used from a workstation
- B. A server ID may never be used to access a database
- C. The server name in the ACL is set to a type of Server
- D. The name LocalDomainServers has manager rights to the database

Answer: C

---

**QUESTION 45:**

Access Control List (ACL) entries are checked in a specific order when a user authenticates. Which of the following correctly identifies that order?

- A. Anonymous entry > group entry > server entry > wildcard entry
- B. Server entry > -Default- entry > anonymous entry > group entry
- C. Explicit entry > group entry > wildcard entry > -Default- entry
- D. Wildcard entry > deny access entry > group entry > explicit entry

Answer: C

---

**QUESTION 46:**

A Configuration Directory utilizes a primary Domino Directory for which of the following?

- A. To negotiate replication settings and obtain the administrative server requests
- B. To obtain information on Person, Group, Mail-In Database, and Resource documents
- C. To obtain information on connection, program, schedule, and certificate documents
- D. To allow remote users to passthru to internal Domino servers as defined in the Configuration Directory

Answer: B

---

**QUESTION 47:**

A Domino domain is a group of Domino servers that share the same which of the following?

- A. Physical LAN
- B. Domino Directory
- C. Network Protocol
- D. Organization certifier

Answer: B

---

**QUESTION 48:**

Alan has specified multiple Notes network ports available to TCP/IP on the Domino server. By default, all TCP/IP-based services on a Domino server listen for network connections on all NICs and on all configured IP addresses on the server. How does Alan configure Domino to listen to a specific address?

- A. Bind a port to a specific address in the notes.ini
- B. Disable all network cards except for the card with the IP address desired
- C. Configure the physical server to assign all IP addresses to one network card
- D. Enter specific addresses into Domino IP configuration documents in the Domino Directory

Answer: A

---

**QUESTION 49:**

Domino Web Access requires which of the following server tasks to be running?

- A. IMAP
- B. SMTP
- C. DOLS
- D. HTTP

Answer: D

---

**QUESTION 50:**

Each time Melissa creates a certifier ID, Domino creates a certifier ID file and which of the following?

- A. Password database
- B. Certifier document
- C. Password hash file
- D. Certifier database

Answer: B

---

**QUESTION 51:**

While configuring an Internet Site document, Kira has left the option blank for which Domino server hosts the site. What is the default action the server will perform with this option not configured?

- A. The Internet Site will not be loaded on any Domino server
- B. The Internet Site will be loaded on all Domino servers in the domain
- C. The Internet Site will only accept connections for the first IP Address on the server
- D. The Internet Site will only accept connections for the hostname in the server document

Answer: A

---

**QUESTION 52:**

Which type of server installation provides standard Domino application services and custom Domino databases for Notes and Web clients, as well as support for clusters?

- A. Domino Utility Server
- B. Domino Database Server
- C. Domino Messaging Server
- D. Domino Enterprise Server

Answer: A

---

**QUESTION 53:**

The Domino domain name can be found in which of the following documents?

- A. Server
- B. Program
- C. Certificate
- D. All of the above

Answer: A

---

**QUESTION 54:**

When the LDAP service can't find information for which an LDAP client is searching, it can return a referral to the client. What Domino service does it utilize to provide this referral?

- A. MAPS
- B. Referrer
- C. Replicator

D. Directory Assistance

Answer: D

---

**QUESTION 55:**

Why did Tim designate Server1/Boise/ Certkiller as the Administration Server for the Domino Directory?

- A. To make sure that all new users were registered on Server1/Boise/ Certkiller .
- B. To prevent users from making changes to the Domino Directory on Server1/Boise/ Certkiller
- C. To force administrators to make all changes to the Domino Directory on Server1/Boise/ Certkiller .
- D. To ensure that the Administration Process would process all Domino Directory changes on Server1/Boise/ Certkiller .

Answer: D

---

**QUESTION 56:**

What is the lowest level of rights in the Domino Directory ACL that allows the creation of groups?

- A. Author with the Group Creator role
- B. Editor with the Group Manager role
- C. Designer with the Group Maintainer role
- D. Reader with the Group Administrator role

Answer: A

---

**QUESTION 57:**

While installing the first Domino server, Alan is presented with a list of Internet services. Which of the following are selections for Alan under Internet services?

- A. Database Replicator, Ports, and Web Interfaces
- B. Directory engines, Schedule Management, and Billing
- C. Web browsers, Internet Mail clients, and Directory services
- D. Protocols, Domino Enterprise Connection Services, and Web Statistics

Answer: C

---

**QUESTION 58:**

Recovery information has been configured for the Organizational Unit certifier

Packaging. The administrator has selected 8 administrators that can process recovery information, but 3 are required to unlock any certified with the Packaging certifier. What three administrators in the list must be utilized?

- A. Any three administrators
- B. The last three administrators
- C. The first three administrators
- D. Any consecutive three administrators

Answer: A

---

**QUESTION 59:**

When changing the order in which ports are listed in the server Setup Ports dialog box, where does this also change the Ports listing?

- A. In the server document
- B. In the server notes.ini
- C. In the server ports document
- D. In the server configuration document

Answer: B

---

**QUESTION 60:**

Your Organizational certifier is named Certkiller . Each city in your company has an Organizational Unit certifier from the Certkiller certifier that references the city. Susan wants to create an Organizational Unit certifier below the city Organizational Unit certifier. Which one of the following must she have to accomplish this?

- A. Reader access to the domain's directory
- B. A copy of the Certkiller Organizational certifier
- C. A copy of the city's Organizational Unit certifier
- D. Copies of both the Certkiller Organizational certifier and the location's Organizational Unit certifier

Answer: C

---

**QUESTION 61:**

The Certification log records information related to which of the following?

- A. Certification, recertification, and name changes
- B. DOLS certificates, SSL key expirations and Internet sites
- C. Recertification, self-signed certificates, and SSL key expirations
- D. Group membership, self-signed certificates, and S/MIME certificates

Answer: A

---

**QUESTION 62:**

What two canonical name components are required when registering new users?

- A. Common name and country
- B. Organization and country
- C. Common name and organization
- D. Organizational unit and organization

Answer: C

---

**QUESTION 63:**

Domino has the ability to route mail in which of the following two default protocols?

- A. MIME and S/MIME
- B. POP3 and IMAP
- C. LDAP and HTTP
- D. NRPC and SMTP

Answer: D

---

**QUESTION 64:**

Nedra wants to override all connection documents and scheduling for mail routing and send mail from one server to another immediately. Which of the following is the command she should enter on the server console?

- A. Mail servername
- B. Route servername
- C. Tell Router Show
- D. Tell Router send servername

Answer: B

---

**QUESTION 65:**

Which server console command adds or changes a setting in the NOTES.INI file?

- A. Load update
- B. Enter change
- C. Set Configuration
- D. Update notes variable

Answer: C

---

**QUESTION 66:**

Fred has decided that Server4/ Certkiller will receive mail from the Internet. What steps from the below options must be performed for this to function?

- A. POP3 must be loaded on the server
- B. The variable InternetMail=1 must be placed in the server's notes.ini
- C. The SMTP listener task must be set to enabled in the Domino Directory
- D. The LDAP task must be added to the server notes.ini under ServerTasks=

Answer: C

---

**QUESTION 67:**

Each port on a Domino server may be in how many Notes Named Networks?

- A. One
- B. Two
- C. Four
- D. Seven

Answer: A

---

**QUESTION 68:**

Otto has noticed that when the Domino server launches, the Router states that it is in the domain Certkiller .com for receiving Internet email. Otto has yet to create a Global Domain document for his environment. Where is the server obtaining the domain name information?

- A. From the server's host name
- B. From the Ports tab of the server document
- C. From the FQDN field on the server document
- D. From a notes.ini variable SMTPMailDomain= Certkiller .com

Answer: A

---

**QUESTION 69:**

POP3 and IMAP use which of the following for user authentication?

- A. A Notes ID file
- B. Single sign-on (SSO)

- C. Public and private keys
- D. Username and Internet password

Answer: D

---

**QUESTION 70:**

Marshall has noticed that there is large amounts of conversion taking place of messages on the server. He wishes to reduce the amount of MIME to CD conversion. Where would he find the setting to adjust the format used to store a message in the user's mailfile?

- A. The mail server document
- B. The user's Person document
- C. The Global Domain document
- D. The SMTP configuration document

Answer: B

---

**QUESTION 71:**

Which of the following server tasks examines all documents in a database to find and update Readers and Authors fields, by default?

- A. Updall
- B. Catalog
- C. Agent Manager
- D. Administration Process

Answer: D

---

**QUESTION 72:**

Where can you view server statistics in the Domino Administrator client?

- A. Server tab > Statistics tab
- B. Statistics tab > Server tab
- C. Domino tab > Server Statistics tab
- D. Server Statistics tab > Domino tab

Answer: A

---

**QUESTION 73:**

The purpose of the RnRMgr task is which of the following?

- A. Create an individual document for each mail user in the new RnRBusytime database

with busytime marked

- B. Watch for reservation requests in an R&R database and to process them in the order in which they arrive or were created
- C. Scan all the mail users, rooms and resources in the domain and populate the busytime database with the freetime for each one
- D. Obtain a list of all rooms and resources across the local and foreign domains and consolidate the freetime into a single busytime database on a daily basis

Answer: B

---

**QUESTION 74:**

SMTP stands for which of the following?

- A. Simple Mail Transport Protocol
- B. Simple Mail Transfer Protocol
- C. Standard Mail Transfer Protocol
- D. Standard MailTransport Protocol

Answer: B

---

**QUESTION 75:**

In the Domino Administrator client, how do you view a visual representation of the mail system structure?

- A. Topologies tab > Mail and Messaging tab > Map section > Mail view
- B. Server tab > Mail tab > Routing Map section > Server Connections view
- C. Statistics tab > Messaging tab > Mail Routing section > Topology view
- D. Messaging tab > Mail tab > Mail Routing Topology section > By Connections view

Answer: D

---

**QUESTION 76:**

Which of the following are Domino domains that are not directly connected, but have an intermediary domain?

- A. Global
- B. Adjacent
- C. Non-adjacent
- D. Foreign SMTP

Answer: C

---

**QUESTION 77:**

A Foreign domain document defines the path between a Domino domain and which of the following?

- A. Adjacent domains
- B. Internet domains
- C. External applications
- D. Organizational domains

Answer: C

---

**QUESTION 78:**

Rob runs the task UPDALL with the -R argument on his server. What will this accomplish?

- A. It rebuilds indices in all views in all databases on the server.
- B. It discards damaged indices in all views in all databases on the server.
- C. It deletes all indices so that they can be recreated when users access them.
- D. It removes unused space from indices in all views in all databases on the server.

Answer: A

---

**QUESTION 79:**

In which of the following databases may you view all the database ACLs on a server by user name, access level, or by database?

- A. Log
- B. Names
- C. Catalog
- D. Certlog

Answer: C

---

**QUESTION 80:**

A user is attempting to send an encrypted mail message to another user on the same Domino system. Which of the following is utilized to encrypt the message?

- A. The sender's public key
- B. The sender's private key
- C. The recipient's public key
- D. The recipient's private key

Answer: C

---

**QUESTION 81:**

Roles are specific to which of the following?

- A. The domain for which they were created
- B. The database for which they were created
- C. The server task to which they are assigned
- D. The server for which they are assigned to run on

Answer: B

---

**QUESTION 82:**

The TCP Authentication field "Redirect TCP to SSL" is set to "No". What effect does this setting have?

- A. To allow clients and servers to use SSL or TCP/IP to access the Web site
- B. To allow clients and servers to use TCP/IP and POP3 to access the web site
- C. To require clients and servers to use the SSL protocol to access the Web site
- D. To require clients and servers to utilize LDAP to retrieve authentication information

Answer: A

---

**QUESTION 83:**

Which of the following fields grants the highest level of agent access on the server?

- A. Run restricted LotusScript/Java agents
- B. Run unrestricted methods and operations
- C. Run restricted Simple and Formula agents
- D. Run unrestricted LotusScript/operating commands

Answer: B

---

**QUESTION 84:**

Access Control List (ACL) entries are checked in a specific order when a user authenticates. Which of the following correctly identifies that order?

- A. Anonymous entry > group entry > server entry > wildcard entry
- B. Server entry > -Default- entry > anonymous entry > group entry
- C. Explicit entry > group entry > wildcard entry > -Default- entry
- D. Wildcard entry > deny access entry > group entry > explicit entry

Answer: C

---

**QUESTION 85:**

Ronald needs to modify a group name and remove a user from numerous database ACLs. Which of the following best represents the steps he should take to make this change?

- A. Add each database to his Bookmarks and then open each one individually to change the ACLs
- B. Using Domino Designer, open each database's default form and make the necessary changes to the ACL
- C. Using the Domino Administrator client, from the files tab open each database individually to change the ACLs
- D. Using the Domino Administrator client, from the files tab select all the databases that need to be modified, then select Files- Access Control - Manage and make the necessary changes

Answer: D

---

**QUESTION 86:**
