

Exam : 190-721

Title : IBM Lotus Notes Domino 7 Building the Infrastructure

Ver : 11.27.08

QUESTION 1

Kevin, the Domino administrator, needs to connect to the Domino Controller through a firewall. What program must be configured properly for this functionality?

- A. Binder service
- B. Service binder
- C. Bind controller
- D. Controller binder

Answer: B

QUESTION 2

Automatic Diagnostic Collection stores reports in Fault Report documents. In what database are these documents stored?

- A. DDM.nsf
- B. Reports.nsf
- C. The log.nsf of each server
- D. A mail-in database defined by the administrator

Answer: D

QUESTION 3

Due to space considerations on her Domino server, Anissa has had to locate new databases under a folder not in the Domino data directory. Instead she has placed them on the F drive. Which one of the following should Anissa use to make these databases accessible to the users?

- A. Database Link
- B. Directory Link
- C. Profile Document
- D. File Protection Document

Answer: B

QUESTION 4

The Domino administrator has created a response file for a silent server installation. What parameter must be run on the server to utilize this response file?

- A. setup.exe -silent -options c:\temp\install.txt
- B. nsetup.exe -silent -options c:\temp\install.txt
- C. setup.exe -response -options c:\temp\install.txt
- D. silent.exe -response -options c:\temp\install.txt

Answer: A

QUESTION 5

If the Fault Analyzer task locates duplicate fault reports, which is the next step the task will take?

- A. The new crash is reported as a response to the original crash
- B. The new crash is not reported because it matches a previous fault reported
- C. The new crash is reported as a new document but a doclink is created to the original
- D. The new crash is reported as a new document and no reference to matching documents can be created

Answer: A

QUESTION 6

In which of the following databases does the Server Health Monitor store its health reports?

- A. shmon.nsf
- B. dommon.nsf
- C. statrep.nsf
- D. serverhm.nsf

Answer: B

QUESTION 7

The Domino Domain Monitoring database (ddm.nsf) may be viewed from which of the following client types?

- A. Lotus Notes and Web client only
- B. Lotus Notes and Domino Administrator only
- C. Lotus Notes, Domino Administrator and Web client
- D. Lotus Notes, Domino Administrator and Domino Developer

Answer: D

QUESTION 8

Which task in a Domino cluster checks for availability of other servers in the cluster?

- A. Cluster Manager
- B. Cluster Updater
- C. Cluster Operator
- D. Cluster Load Balancer

Answer: A

QUESTION 9

Latrice set up domain searching. Which one of the following is referenced when a domain search is made?

- A. Domain Catalog
- B. Database Catalog
- C. Domino Directory
- D. Directory Assistance

Answer: A

QUESTION 10

Event handlers contain numerous notification methods. Which of the following is NOT a supported notification method?

- A. Pager
- B. Broadcast
- C. Outbound phone call
- D. Log to Windows NT Event Viewer

Answer: C

QUESTION 11

By default, all TCP/IP-based services on a Domino server listen for network connections on which NICs and IP addresses?

- A. The NIC with the lowest, and only that, IP address
- B. The first NIC and all IP addresses assigned to that NIC
- C. The first NIC and first IP address assigned to that NIC
- D. All NICs and on all configured IP addresses on the server

Answer: D

QUESTION 12

Which one of the following directory structures is supported by Lotus Domino?

- A. A central directory structure only
- B. A distributed directory structure only
- C. A remote and foreign directory structure
- D. A distributed or central directory structure

Answer: D

QUESTION 13

What are the two types of DDM Web probes?

- A. Uptime and Failure
- B. Logging and Failure
- C. Performance and Enabled
- D. Best Practices and Configuration

Answer: D

QUESTION 14

You must create a DDM collection hierarchy to initiate which of the following?

- A. Data roll-up
- B. Probe initiation
- C. Probe interface
- D. Data interface

Answer: A

QUESTION 15

A DDM application probe performs which of the following?

- A. Checks Web settings
- B. Probes agent schedules
- C. Checks server replication
- D. Probes database operations

Answer: B

QUESTION 16

Jose set up Web authentication using primary and secondary directories. Which one of the following describes the order in which he set up directories to be searched?

- A. Domino primary directory, then Domino secondary directories. This is the only option available.
- B. Domino primary directory, then either Domino or LDAP secondary directories. The administrator can specify the order of secondary searches.
- C. LDAP primary directory, then LDAP secondary directory, and then Domino secondary directories. This is the order in which secondary searches must be made.
- D. Domino primary directory, then Domino secondary directory, and then LDAP secondary directories. This is the order in which secondary searches must be made.

Answer: B

QUESTION 17

Domino Domain Monitoring (DDM) contains how many classes of event information?

- A. One

- B. Two
- C. Three
- D. Four

Answer: B

QUESTION 18

Edison, the Domino Administrator, wants to enforce file security on HTML and Image files. Which one of the following should he do?

- A. Enforce ECLs
- B. Create File Protection documents
- C. Use Protect Directories in the HTTPD.CNF files
- D. Domino does not allow security enforcement on HTML and image files

Answer: B

QUESTION 19

The Domino administrator is attempting to verify that IMAP requests are being processed correctly. Which probe should be created to monitor those types of requests?

- A. SMTP Process State
- B. POP3 Process State
- C. Message access TCP Port Health
- D. Message retrieval TCP Port Health

Answer: D

QUESTION 20

Mike, the Domino administrator, has configured Rooms & Resources across a cluster. When multiple replicas of the resource database exist in the cluster, where is processing handled if all the servers are available?

- A. The user's home server
- B. The resource's home server
- C. The first cluster server available
- D. The server closest to the physical location of the resource

Answer: B

QUESTION 21

Jemiah has a request from management to stop sending delivery status notifications for failed or delayed messages to sending SMTP hosts. What must be set to disabled in the server configuration document?

- A. HELP command

- B. DSN extension
- C. Denied command
- D. Pipelining extension

Answer: B

QUESTION 22

There are two methods available for journaling messages. Which of the following describe those two methods?

- A. Monthly journaling and hourly journaling
- B. Daily journaling and weekly journaling
- C. Local journaling and remote journaling
- D. Domain journaling and organization journaling

Answer: C

QUESTION 23

In order to specify connecting hosts to be excluded from blacklist checks, which filter should be utilized?

- A. Public spam lists
- B. Private blacklists
- C. Private whitelists
- D. Public allow lists

Answer: C

QUESTION 24

Edward is configuring a custom SMTP error response message for hosts found in DNS blacklists. What is the variable to include the IP address of the connecting host in the error response message?

- A. %b
- B. %h
- C. %s
- D. %t

Answer: C

QUESTION 25

Chris has enabled Message Tracking for his domain. He has left the field 'Allowed to track messages' blank. With no entry in this field who is allowed to track messages?

- A. No one
- B. Administrators

- C. LocalDomainServers
- D. All users in the domain

Answer: C

QUESTION 26

The NoSpam domain has configured the usage of DNS whitelists. If a connecting host is not found in a DNS whitelist, what is the next step of mail processing?

- A. SMTP Amgr filters
- B. DNS blacklist filters
- C. Private blacklist filters
- D. Private whitelist filters

Answer: B

QUESTION 27

Private server blacklists are stored in what database?

- A. names.nsf
- B. blacklist.nsf
- C. smtpconf.nsf
- D. A Domino administrator defined database

Answer: A

QUESTION 28

If the connecting server's local Domino Directory does not contain information about the destination server, what step is taken next by the connecting server?

- A. It notifies the administrator that the remote server is unknown
- B. It tries to locate a local phone number and make a Notes Dialup connection
- C. It appends the local Notes domain to the destination server name and creates a connection record automatically
- D. It tries to connect directly to the destination server on the LAN by using the server common name as its address

Answer: D

QUESTION 29

DNS whitelists may be overridden by which of the following?

- A. Server-based mail rules
- B. Server-signed agents in mail.box
- C. Private whitelists and DNS blacklists
- D. Private whitelists and private blacklists

Answer: D

QUESTION 30

When an S/MIME signed message has a disclaimer added by the server and is received by a Notes user, which of the following is the result?

- A. The signature cannot be verified
- B. The signature is stripped from the message
- C. The message cannot be read by the recipient
- D. The message cannot be transmitted and is returned to the user

Answer: A

QUESTION 31

What tasks must be running in order to allow the Resource Reservations database to function without an administrator's intervention?

- A. AMgr and Adminp
- B. Router and RnRMgr
- C. RnRMgr and Adminp
- D. AMgr and RnRMgr

Answer: D

QUESTION 32

You are configuring Directory Assistance to utilize replicas of databases across numerous servers. However, you wish for the first lookup to be done locally for a replica. What should be placed in the Server Name field of the Directory Assistance document?

- A. *
- B. Local
- C. Notes
- D. Primary

Answer: A

QUESTION 33

What is the Database Instance ID (DBIID) used for?

- A. It ensures that replica IDs aren't duplicates.
- B. It identifies design elements within a database.
- C. It is used in replication to identify common databases.
- D. It matches changes with a specific database for transaction logging.

Answer: D

QUESTION 34

Event documents in DDM are correlated, that is, grouped into similar categories whenever possible. You can view correlated events by clicking which of the following?

- A. The Correlated Events tab in the Probe document for any event that is correlated
- B. The Correlated Events view in the log.nsf database for any event that is correlated
- C. The Correlated Events view in the ddm.nsf database for any event that is correlated
- D. The Miscellaneous Events view in the log.nsf database for any event that is correlated

Answer: A

QUESTION 35

What process is used to update the set of Notes public and private keys that is stored in user and server ID files?

- A. Key rollover
- B. Custom password policies
- C. LTPA name mapping process
- D. 128-bit encryption process

Answer: A

QUESTION 36

text{Severity of an event is assigned at what time for DDM Security probes?

- A. During runtime
- B. During configuration of the probe
- C. During the DDM server task each evening
- D. During each night according to an administrator set schedule

Answer: A

QUESTION 37

Pam, the Domino administrator, wishes to send operating system commands to the server Domino is running on. Which of the following must be running on the server to allow this functionality?

- A. Shell Server
- B. OS Integrator
- C. Domino Console
- D. Server Controller

Answer: D

QUESTION 38

Which one of the following server console commands should be utilized to clear the database cache?

- A. DBCache Flush
- B. DBCache Clear
- C. Database Flush
- D. Database Clear Cache

Answer: A

QUESTION 39

The Domino Console requires which of the following to authenticate?

- A. A Notes ID file
- B. Port encryption
- C. SSL certificates
- D. An Internet name and password

Answer: D

QUESTION 40

If the Extended Directory Catalog functions as a remote primary Domino Directory used by servers with Configuration Directories, what domain should be specified in Directory Assistance configuration?

- A. The domain ibm.com should always be specified
- B. The domain of the servers with the Configuration Directories
- C. Always input the domain name as a Fully Qualified Domain Name (FQDN)
- D. A unique domain name for each Extended Directory Catalog being utilized

Answer: B

QUESTION 41

Jose wants to see the replication topology map of his Notes domain. To see this topology, what must he do?

- A. Load the MAPS server task
- B. Load the TOPMAP server task
- C. Load the MAPTOP server task
- D. Load the TOPOLOGY server task

Answer: A

QUESTION 42

Brie left the Create New Replicas field blank on a server document. Who can create new

replica databases on that server?

- A. No one
- B. Administrators
- C. LocalDomainServers
- D. Everyone in the domain

Answer: A

QUESTION 43

Richard wants to issue Internet certificates to his current Notes users. He wants to do this step without having the users submit an Internet certificate request and merge the certificate into the ID file. What steps must he perform to have the certificates issued and automatically placed into the users' id files?

- A. Paste the Internet Certificate into each person record manually
- B. Select the action 'Embed new Internet Cert to All' from the Domino Administrator
- C. It is not possible to have the certifier automatically inserted into the Notes id files
- D. Select the action 'Add Internet Cert to Selected People.' from the Domino Administrator

Answer: D

QUESTION 44

Lisa, the Domino administrator, has enabled port encryption for the server on the WIFI port. What server console command can she utilize to have the port encryption take effect immediately?

- A. wifi port reset
- B. restart port wifi
- C. encrypt port wifi
- D. port wifi encrypt

Answer: B

QUESTION 45

Which one of the following statements regarding the Certificate Authority (CA) is true?

- A. The CA issues Lotus Notes certificates only.
- B. The CA issues Internet certificates only.
- C. Access to the certifier ID must be granted.
- D. The CA issues both Lotus Notes and Internet certificates.

Answer: D

QUESTION 46

The Domino administrator has created a response file for a silent server installation. What parameter must be run on the server to utilize this response file?

- A. setup.exe -silent -options c:\temp\install.txt
- B. nsetup.exe -silent -options c:\temp\install.txt
- C. setup.exe -response -options c:\temp\install.txt
- D. silent.exe -response -options c:\temp\install.txt

Answer: A

QUESTION 47

If the Fault Analyzer task locates duplicate fault reports, which is the next step the task will take?

- A. The new crash is reported as a response to the original crash
- B. The new crash is not reported because it matches a previous fault reported
- C. The new crash is reported as a new document but a doclink is created to the original
- D. The new crash is reported as a new document and no reference to matching documents can be created

Answer: A

QUESTION 48

The collected probe results in a DDM Collection Hierarchy database are replicated when which of the following occurs?

- A. A collection server initiates a push replication with a spoke server
- B. A collection server is notified about the change in an event state on a monitored server
- C. A collection server receives the console command 'probe xxx' where xxx is a remote server
- D. A collection server obtains an SMTP message in the ddm.nsf database notifying it to pull new events

Answer: B

QUESTION 49

Chaz, the Domino administrator, has noticed performance issues when LDAP searches are being performed against the Domino Directory. Which of the following is the best offered solution to improve performance?

- A. Extend the LDAP schema to add new attributes
- B. Create a full text index of the Domino Directory
- C. Configure Directory Assistance to load all users into memory in advance
- D. Delete the (\$LDAP) view in the Domino Directory and let it rebuild automatically

Answer: B

QUESTION 50

Edison, the Domino Administrator, wants to enforce file security on HTML and Image files. Which one of the following should he do?

- A. Enforce ECLs
- B. Create File Protection documents
- C. Use Protect Directories in the HTTPD.CNF files
- D. Domino does not allow security enforcement on HTML and image files

Answer: B

QUESTION 51

The Domino administrator is attempting to verify that IMAP requests are being processed correctly. Which probe should be created to monitor those types of requests?

- A. SMTP Process State
- B. POP3 Process State
- C. Message access TCP Port Health
- D. Message retrieval TCP Port Health

Answer: D

QUESTION 52

You wish to resolve an issue without user intervention based on a received event in DDM. Which handler notification method provides this functionality?

- A. Pager
- B. Broadcast
- C. Run an Agent
- D. Log to Database

Answer: C

QUESTION 53

Jeffrey wishes to view the name of a Domino cluster, some statistics for the current server, and the names of all the cluster servers. What is the server console command that he should issue?

- A. Show stats
- B. Show cluster
- C. Show configuration
- D. Tell cluster report

Answer: B

QUESTION 54

Latrice set up domain searching. Which one of the following is referenced when a domain search is made?

- A. Domain Catalog
- B. Database Catalog
- C. Domino Directory
- D. Directory Assistance

Answer: A

QUESTION 55

The DDM Web Configuration probe will evaluate which of the following document types?

- A. Web Server Configurations, Web Programs document, and the Program document
- B. Server Document, the Connections document, and the File Identifications document
- C. Server document, the Internet Site document, and the Web Server Configurations document
- D. Internet Site document, Web Server Configurations document and the File Identifications document

Answer: C

QUESTION 56

Domino Domain Monitoring (DDM) enhanced events contains which of the following?

- A. Specific target information only
- B. Events generated by an event probe only
- C. Events generated by an event generator only
- D. All of the above

Answer: D

QUESTION 57

Which of the following ports uses the server document for binding while the rest require entries in the NOTES.INI file?

- A. ICM
- B. HTTP
- C. SMTP
- D. LDAP

Answer: B

QUESTION 58

Automatic Diagnostic Collection stores reports in Fault Report documents. In what database are these documents stored?

- A. DDM.nsf
- B. Reports.nsf
- C. The log.nsf of each server
- D. A mail-in database defined by the administrator

Answer: D

QUESTION 59

Sal set up a mail routing event generator. What does this generator provide?

- A. It loads all mail tasks on the server
- B. It creates entries in the EVLOG.NSF database
- C. It tests connectivity to all other mail servers in the domain
- D. It sends a mail trace message to a specified user's mail server

Answer: D

QUESTION 60

Mike, the Domino administrator, has configured Rooms & Resources across a cluster. When multiple replicas of the resource database exist in the cluster, where is processing handled if all the servers are available?

- A. The user's home server
- B. The resource's home server
- C. The first cluster server available
- D. The server closest to the physical location of the resource

Answer: B

QUESTION 61

Due to space considerations on her Domino server, Anissa has had to locate new databases under a folder not in the Domino data directory. Instead she has placed them on the F drive. Which one of the following should Anissa use to make these databases accessible to the users?

- A. Database Link
- B. Directory Link
- C. Profile Document
- D. File Protection Document

Answer: B

QUESTION 62

In which of the following databases does the Server Health Monitor store its health reports?

- A. shmon.nsf
- B. dommon.nsf
- C. statrep.nsf
- D. serverhm.nsf

Answer: B

QUESTION 63

Sanda, the Domino administrator, wishes to monitor the search response time for LDAP searches. Which of the following DDM Directory probes would she create?

- A. LDAP Search Response
- B. Directory Availability
- C. NAMELookup Search Response
- D. Secondary LDAP Search Response

Answer: A

QUESTION 64

The Domino Console connects to the Controller over what default port?

- A. 80
- B. 1352
- C. 1533
- D. 2055

Answer: D

QUESTION 65

Murphy, the Domino administrator, has added a new domain to the Global Domain document. However, the new domain is not being seen even after he instructed the Router to reload its configuration. Which of the following is the most likely cause of this?

- A. The NOTES.INI file on the Domino server must include the line 'ReloadGlobalFromCommand=1'
- B. The Router must be given the command 'Tell Router Update Global' at the server console
- C. The LDAP task must be shut down and be restarted in addition for the new Global

Domain to be seen by Domino

D. The Router does not check the Global Domain document for changes in response to the update configuration command

Answer: D

QUESTION 66

If a DNS whitelist query returns an IP address, which of the following is the Domino server's next step?

- A. The host is added to the whitelist and the blacklists are then checked next
- B. The host is added to the whitelist and the remaining DNS whitelists are not searched
- C. The private blacklists are queried and if the connecting host is found, the message is rejected
- D. The private whitelists are then queried and other connections are held until processing is done

Answer: B

QUESTION 67

Edward is configuring a custom SMTP error response message for hosts found in DNS blacklists. What is the variable to include the IP address of the connecting host in the error response message?

- A. %b
- B. %h
- C. %s
- D. %t

Answer: C

QUESTION 68

Chris has enabled Message Tracking for his domain. He has left the field 'Allowed to track messages' blank. With no entry in this field who is allowed to track messages?

- A. No one
- B. Administrators
- C. LocalDomainServers
- D. All users in the domain

Answer: C

QUESTION 69

The NoSpam domain has configured the usage of DNS whitelists. If a connecting host is not found in a DNS whitelist, what is the next step of mail processing?

- A. SMTP Amgr filters
- B. DNS blacklist filters
- C. Private blacklist filters
- D. Private whitelist filters

Answer: B

QUESTION 70

Connection records between servers are searched in a particular order. Once a normal priority connection document is found in the Domino Directory, what is the proper order Domino will use connections?

- A. Notes Direct Dialup; Local Area Network; Passthru server; Hunt group of passthru server; Network Dialup
- B. Hunt group of passthru server; Notes Direct Dialup; Local Area Network; Network Dialup; Passthru server
- C. Local Area Network; Network Dialup; Notes Direct Dialup; Passthru server; Hunt group of passthru servers
- D. Passthru server; Network Dialup; Hunt group of passthru servers; Notes Direct Dialup; Local Area Network

Answer: C

QUESTION 71

Private whitelist filtering on the Domino server only applies to which of the following types of connections?

- A. Hosts subject to inbound relay enforcement
- B. Hosts subject to outbound relay enforcement
- C. Hosts subject to maximum message size restrictions
- D. Hosts subject to the addition of message disclaimers

Answer: A

QUESTION 72

There are two methods available for journaling messages. Which of the following describe those two methods?

- A. Monthly journaling and hourly journaling
- B. Daily journaling and weekly journaling
- C. Local journaling and remote journaling
- D. Domain journaling and organization journaling

Answer: C

QUESTION 73

Message disclaimers that are to be added by the server are configured in what location?

- A. The server document
- B. The server notes.ini file
- C. The server policy document
- D. The server configuration document

Answer: D

QUESTION 74

Blacklist processing on the server follows which order?

- A. Private, then public
- B. Public, then private
- C. Shared, then controlled
- D. Managed, then controlled

Answer: A

QUESTION 75

Disabling the EXPN command for inbound SMTP traffic performs which one of the following?

- A. Domino does not expand lists and groups
- B. Domino denies requests to verify user names
- C. Domino accepts inbound requests to verify user names
- D. Domino expands mailing lists or groups to show individual recipient names

Answer: A

QUESTION 76

What tasks must be running in order to allow the Resource Reservations database to function without an administrator's intervention?

- A. AMgr and Adminp
- B. Router and RnRMgr
- C. RnRMgr and Adminp
- D. AMgr and RnRMgr

Answer: D

QUESTION 77

A user is logging on with only a flat name for Internet authentication. Which of the following directories will be searched through Directory Assistance with trusted rules?

- A. All directories listed
- B. The primary Domino Directory only
- C. Directories specified to allow flat name searches
- D. Only directories that do not specify hierarchical trusted rules

Answer: A

QUESTION 78

Which of the following arguments runs the Server Controller and the Domino Console?

- A. nserver -jc
- B. nserver -jc -c
- C. nserver -jc -s
- D. nserver -jc -c -s

Answer: C

QUESTION 79

Joe is currently working on the Domino server console and wishes to see what directories are being utilized by directory services. Which of the following console commands should he issue to see this information?

- A. Show Xdir
- B. Show DirSvcs
- C. Show DirConfig
- D. Show Directories

Answer: A

QUESTION 80

To assign an event to an administrator, or to reassign events that are owned by another administrator, you must have a minimum of what role and rights in the ACL for ddm.nsf?

- A. Author access with the role Change Owner
- B. Author access with the role Assign Events
- C. Editor access with the role Assign Events
- D. Editor access with the role Change Owner

Answer: C

QUESTION 81

Which one of the following database elements is not updated when the DESIGN task is run?

- A. Forms
- B. Views

- C. Roles
- D. Agents

Answer: C

QUESTION 82

If the Extended Directory Catalog functions as a remote primary Domino Directory used by servers with Configuration Directories, what domain should be specified in Directory Assistance configuration?

- A. The domain ibm.com should always be specified
- B. The domain of the servers with the Configuration Directories
- C. Always input the domain name as a Fully Qualified Domain Name (FQDN)
- D. A unique domain name for each Extended Directory Catalog being utilized

Answer: B

QUESTION 83

A DDM Security probe generates an event when it finds which of the following?

- A. An expired certifier for a person
- B. A problematic database or server configuration
- C. A monitored database has a local copy created by a user
- D. An attempted database access by a person or server not authorized

Answer: B

QUESTION 84

A client wishes to enable stronger encryption for their user.id file. Which of the following are the proper steps to enable this?

- A. In User Preferences, change your mail settings to 'local encryption'
- B. In User Security, change your name and choose the higher encryption rate
- C. In User Security, change your password and choose the higher encryption rate
- D. In User Preferences, change your location document to the 'stronger encryption' location

Answer: C

QUESTION 85

What is the Database Instance ID (DBIID) used for?

- A. It ensures that replica IDs aren't duplicates.
- B. It identifies design elements within a database.
- C. It is used in replication to identify common databases.
- D. It matches changes with a specific database for transaction logging.

Answer: D

QUESTION 86

You have started multiple replicator tasks on the server application1/company. What is the Domino server console command to have the second replicator task quit?

- A. Tell replica quit
- B. Tell 2 replica quit
- C. Tell replica 2 quit
- D. Tell replica quit 2

Answer: A

QUESTION 87

Jose wants to see the replication topology map of his Notes domain. To see this topology, what must he do?

- A. Load the MAPS server task
- B. Load the TOPMAP server task
- C. Load the MAPTOP server task
- D. Load the TOPOLOGY server task

Answer: A

QUESTION 88

Barbara wishes to migrate her company's Notes certifier to the new Certificate Authority process. She has chosen to encrypt the certifier id with the server id. What Domino server console command must be issued next?

- A. load unlock ca <idfile>
- B. load ca <password> unlock
- C. tell ca activate <password>
- D. tell ca unlock <idfile><password>

Answer: C

QUESTION 89

Richard wants to issue Internet certificates to his current Notes users. He wants to do this step without having the users submit an Internet certificate request and merge the certificate into the ID file. What steps must he perform to have the certificates issued and automatically placed into the users' id files?

- A. Paste the Internet Certificate into each person record manually
- B. Select the action 'Embed new Internet Cert to All' from the Domino Administrator
- C. It is not possible to have the certifier automatically inserted into the Notes id files

D. Select the action 'Add Internet Cert to Selected People.' from the Domino Administrator

Answer: D

QUESTION 90

Lisa, the Domino administrator, has enabled port encryption for the server on the WIFI port. What server console command can she utilize to have the port encryption take effect immediately?

- A. wifi port reset
- B. restart port wifi
- C. encrypt port wifi
- D. port wifi encrypt

Answer: B
