The Power of Knowing

Exam : 190-722

**Title : IBM Lotus Notes Domino 7 Managing
Servers and Users** ☐ ☐

Ver : 11.27.08

QUESTION 1:

Smart Upgrade failover utilizes what search order?

- A. By document link in the Notes client
- B. By server name and hard-coded path to the Smart Upgrade database
- C. By database replica ID and database name in the home server cluster
- D. By notes.ini variable on the client listing all servers in the domain the Smart Upgrade database may be found on

Answer: C

QUESTION 2:

When setting up automatic diagnostic collection for clients, you can designate which of the following?

- A. Whether this feature should log the fault recovery into the local log.nsf database on the client
- B. Whether this feature should export the document into an Excel spreadsheet to categorize the fault
- C. Whether this feature is invisible to users or users should be prompted to designate if they want to send a diagnostic report to the mail-in database
- D. Whether this feature should create a file that gets automatically uploaded to the Domino HTTP server to allow client reporting from any location over any connection speed

Answer: C

QUESTION 3:

When installing the Notes client, what documents are created by default that contain communication, Java applet security and port information?

- A. Account
- B. Location
- C. Connection
- D. Certificate

Answer: B

QUESTION 4:

Breanna has registered a roaming user. By default, where are the user's files stored?

- A. On all servers
- B. On all mail servers
- C. On the user's mail server

D. On the user's file server

Answer: C

QUESTION 5:

Liz wishes to disable transaction logging for a particular database on a server with transaction logging enabled. However, she cannot see the Advanced Database Properties to do so. What is the cause of this?

- A. She is not in the Administrators field on the server document
- B. She cannot selectively turn off transaction logging for individual databases
- C. She must add the notes.ini line to the server DisableTransLog=name of database
- D. Transaction logging can only be disabled per document, not for an entire database

Answer: A

QUESTION 6:

The AutoSave feature of Domino uses the database with which of the following names?

- A. autosave.nsf
- B. safecopy.nsf
- C. autosave_xx.nsf where xx is the user's initials
- D. as_xxxxxxxx.nsf where xx is the user's abbreviated name

Answer: D

QUESTION 7:

Which task performs the operation of obtaining diagnostic data after server and client crashes?

- A. Fault Analyzer
- B. Fault Recovery
- C. Event Handler Notification
- D. Automatic Diagnostic Collection

Answer: D

QUESTION 8:

The Smart Upgrade function can be configured to adjust an installation between just the Notes client or all clients automatically. Where is the parameter read to make this automatic adjustment?

- A. The Notes client notes.ini file
- B. The Domino server notes.ini file that holds the Smart Upgrade database
- C. The server document for the server that holds the Smart Upgrade database
- D. The server configuration document for the server that holds the Smart Upgrade

database

Answer: A

QUESTION 9:

Cherelle, the Domino administrator, is launching Server Health Monitoring for the first time. What tasks are monitored by default for each server?

- A. HTTP, SMTP, Adminp and the Amgr
- B. The core server task, HTTP, SMTP and Adminp
- C. No tasks until the administrator configures the monitoring for each server
- D. All tasks currently running when the Server Health Monitor is first launched

Answer: D

QUESTION 10:

The condensed Directory Catalog is created from which template?

- A. dircat.ntf
- B. dircat5.ntf
- C. dircat7.ntf
- D. catalog.ntf

Answer: B

QUESTION 11:

The Calendar Cleanup tool is available in which policy setting document?

- A. Archive
- B. Desktop
- C. Security
- D. Registration

Answer: A

QUESTION 12:

What Domino feature must be enabled to monitor the number of active Domino Web Access users?

- A. Activity logging
- B. Server health reports
- C. Domino Domain Monitoring
- D. Server monitoring in the Domino Administration client

Answer: A

QUESTION 13:

How often does the Administration Process check to update the Mail Policy for each user?

- A. Every hour
- B. Every 4 hours
- C. Every 12 hours
- D. Every 24 hours

Answer: C

QUESTION 14:

Chuck, the Domino administrator, is having issues with character sets and messages that get disclaimers added by the server. Which of the following configuration changes should he make to correct this issue?

- A. He should remove the character sets from the server
- B. He should have the Notes client add the disclaimers
- C. He should add the missing character sets to the server
- D. He should change the message disclaimer to add a question mark wherever character sets are utilized

Answer: B

QUESTION 15:

Cindy, the Domino administrator, is having issues with numerous mail rules acting sequentially on a message. What should she do to interrupt the mail rules from being processed?

- A. Create a 'stop processing' action in the rules
- B. Issue a 'stop processing' command on the server console
- C. Issue a 'stop processing' command on the server through a program document
- D. Create an agent in mail.box to stop all rule processing after a certain time

Answer: A

QUESTION 16:

DaJuan, the Domino administrator, has made changes to the TCPIP port setting on the server to enable encryption. What server console command must he run to have the changes take effect immediately?

- A. Port TCPIP -reset
- B. Restart port TCPIP
- C. Encrypt port TCPIP
- D. Port TCPIP -encrypt

Answer: B

QUESTION 17:

What step is required before creating a resources document?

- A. A mail document
- B. A site document
- C. A mail-in database for the resources
- D. A hub server running the RnRMgr task

Answer: B

QUESTION 18:

DJ, the Domino administrator, needs to get the status of the Domino server's Smart Upgrade cache. What server console command would he enter?

- A. sucache show
- B. load sucache
- C. show smupgrade
- D. tell smupgrade show

Answer: A

QUESTION 19:

New users are attempting to change their Lotus Notes user.id file password. However, anyone that attempts to end the new password with an exclamation point is denied from using that new password. What is the cause of this denial?

- A. Custom client policy
- B. Custom desktop policy
- C. Custom control policy
- D. Custom password policy

Answer: D

QUESTION 20:

The Domino administrator, William, has issued a name change request for a user. When prompted, the user rejected the name change request. What step, if any, must William take next to complete the name change request?

- A. William must manually choose to reject or reissue the name change
- B. Nothing, as Adminp will process the rejection and reject the name change
- C. Nothing, as the user no longer has a choice to reject name change requests
- D. William must configure Adminp to automatically process name change rejections

Answer: A

QUESTION 21:

Dominique has a number of open Notes documents in her Notes client, and she would like to quickly close all the tabs at once. How can she do this?

- A. Actions ?Close All Tabs
- B. File ?Close Current Open
- C. Actions ?Close Current Open
- D. File ?Close All Open Window Tabs

Answer: D

QUESTION 22:

Joan lost a document she had been creating in a Domino application when the power in the building failed. The Autosave feature was active. What must Joan do to recover her work?

- A. Restart Notes with the ecover option.
- B. Launch the Autosave database (as_autosave.nsf) and retrieve the saved document.
- C. Relaunch Notes, select Yes for recovering unsaved documents, and select the specific unsaved document to recover.
- D. Open the application and select Recover Changes from the Edit menu. The changes are recovered from the hidden \$Autosave view.

Answer: C

QUESTION 23:

For users who are already registered, the administrator may assign explicit policies by which of the following?

- A. Opening the policy.nsf database and editing the user entry
- B. Editing the Person document or using the Assign Policy tool
- C. Editing the user's local location document and restarting the client
- D. Changing the user's name to a new name and back to the original name

Answer: B

QUESTION 24:

Which of the following Notes client tasks automates the deployment of policies to the users?

- A. ndyncfg
- B. nupdate

- C. nplcyupd
- D. ncfgclient

Answer: A

QUESTION 25:

In order for you to find what groups a specific person belongs to, you must do which of the following?

- A. Create a program document for the server task Groupfinder
- B. From the Actions menu select 'Find user' in the Groups view
- C. From the Action bar select 'Find group member' in the Groups view
- D. Enable the manual agent that searches the person documents for group names

Answer: C

QUESTION 26:

Which one of the following best describes the client version reporting feature?

- A. When a client connects to a server, the Lotus Notes version only is added to the Person document in the Domino Directory.
- B. When a client connects to a server, the Lotus Notes version only is added to the version control document in the log file.
- C. When a client connects to a server, the Lotus Notes version and operating system platform machine name are added to the Person document in the log file.
- D. When a client connects to a server, the Lotus Notes version and operating system platform machine name are added to the Person document in the Domino Directory.

Answer: D

QUESTION 27:

Troy, a Notes user, wishes to close all the open tabs on his workspace before exiting the client. Which of the following is the step he will take to perform this?

- A. File - Close - Open Windows
- B. Action - Windows - Close All
- C. File - Close All Open Window Tabs
- D. View - All - Close Current Open Windows

Answer: C

QUESTION 28:

Custom password policies will support which of the following with Notes id files?

- A. Random password generation
- B. Ids protected with Smartcards
- C. Forcing unique characters
- D. Ids protected with multiple passwords

Answer: C

QUESTION 29:

John wants to know which policy settings are effective for certain users and groups within his organization. In which one of the following would he find this information?

- A. The policy synopsis
- B. The Policy Report database
- C. The Policy Settings document
- D. The Policy Overview database

Answer: A

QUESTION 30:

Kendall has been running Activity Trends for a month now. Where would he look to see which databases a particular user has been accessing?

- A. From the Domino Administrator client, select Server > Ports > Database Usage
- B. From the Notes client open the ActTrend.nsf database and navigate to the User view
- C. From the Notes client open the Domino Directory, select the People view > Actions > Database Usage
- D. From the Domino Administrator client, select Server > Performance > Activity Trends > Latest Folder - User

Answer: D

QUESTION 31:

Alyssa, the Domino administrator, wishes to read reports generated from Smart Upgrades. What database holds these reports?

- A. lndsutr.nsf
- B. sutrack.nsf
- C. sureports.nsf
- D. smupgrade.nsf

Answer: A

QUESTION 32:

Which of the following is the Domino task that watches for reservation requests and to process them in the order in which they arrive or were created?

- A. RnrMgr
- B. RoomMgr
- C. ResManager
- D. Reservation

Answer: A

QUESTION 33:

Which of the following policies offer client lock-down?

- A. Mail policy and security policy settings
- B. Desktop policy and mail policy settings
- C. Mail policy and archive policy settings
- D. Desktop policy and archive policy settings

Answer: B

QUESTION 34:

Maria, the Domino administrator, has installed a new user machine. When installed, the workstation created the Workstation ECL from what configuration setting?

- A. The Administration ECL
- B. The Lotus supplied defaults
- C. The ECL template located on the user's local machine
- D. The ECL.nsf database stored on the user's home server

Answer: A

QUESTION 35:

Password verification provides which of the following?

- A. It verifies that an id file never has a blank password
- B. It keeps track of the current password in use by a user
- C. It checks the required length of a Notes password trying to access a server
- D. It verifies that an id file meets the password quality standards the administrator has established

Answer: B

QUESTION 36:

What is the recommended number of Recovery Authorities for a certifier?

- A. One
- B. None
- C. More than one
- D. This option is not configurable

Answer: C

QUESTION 37:

Each SSL server certificate is required to contain which of the following?

- A. The size of the private key
- B. The directory that contains the key ring file
- C. The names of servers authorized to access the server
- D. The distinguished name of the CA that signed the certificate

Answer: D

QUESTION 38:

The Domino administrator wishes to use Certificate Revocation Lists (CRL) for Internet certificate authentication. What is required to make this function correctly?

- A. The server must be running IIS
- B. The server must be running the CRL task
- C. The server must be using a Domino ICL database for certificates
- D. The server must be using a Domino server-based certification authority for issuing Internet certificates

Answer: D

QUESTION 39:

As the administrator you are able to update workstation ECL's automatically by changes made to the Administration ECL. You would like to change the settings for each individual person and what access they have to run certain types of actions on their machine. To accomplish this, you must perform which of the following?

- A. Place <ECLOwner> in the Administration ECL with the new rights
- B. Place <UserName> in the Administration ECL with the new rights
- C. Enter -All Users- in the Administration ECL with the new rights
- D. Enter each individual user name in the Administration ECL with the new rights

Answer: A

QUESTION 40:

Rayne changes the name of a group using the Domino Administrator client. How often does the Administration Process (AdminP) update group names in Author and Reader Names fields by default?

- A. Daily
- B. Hourly
- C. Weekly

D. Immediately

Answer: C

QUESTION 41:

The Domino certificate authority administrator must have which rights to the Domino Directory on a server?

- A. Editor
- B. Author
- C. Reader
- D. Manager

Answer: A

QUESTION 42:

An Internet cross-certificate, that can be used by only the person to whom it is issued, gets stored in which location?

- A. In the certlog.nsf on the user's home server
- B. In the person document of the user in the Domino Directory
- C. In a Certificate document in the user's Personal Address Book
- D. In an Internet Certificate document in the user's home server certdoc.nsf

Answer: C

QUESTION 43:

Which of the following is the name of the process in which you periodically force the update of new public and private keys stored in server id files?

- A. Key update
- B. Key rollover
- C. Applied keyfile
- D. Forced recertification

Answer: B

QUESTION 44:

David wants to view the expired certificates in the Certification Revocation List (CRL). In which one of the following would David find this information?

- A. In the CRL document in the Domino Directory
- B. In the Domain document in the Domino Directory
- C. In the Server document in the Domino Directory
- D. In the Certifier document in the Domino Directory

Answer: D

QUESTION 45:

Domino stores ID recovery information in which location?

- A. Certlog
- B. Server ID file
- C. Domino Directory
- D. Certifier ID file

Answer: D

QUESTION 46:

Breanna has registered a roaming user. By default, where are the user's files stored?

- A. On all servers
- B. On all mail servers
- C. On the user's mail server
- D. On the user's file server

Answer: C

QUESTION 47:

Which of the following is enabled when the administrator specifies the maximum number of Smart Upgrade attempts by specifying a value in the field "Maximum Concurrent Downloads"?

- A. Smart Upgrade Limits
- B. Smart Upgrade Maximum
- C. Smart Upgrade Interval
- D. Smart Upgrade Governor

Answer: D

QUESTION 48:

Nathan has established Automatic Diagnostic Collection for servers. However, the reports are quite large that are being received. Which of the following are available options to help reduce size in the configuration for collection?

- A. Maximum size of NSD output to attach
- B. Number of weeks to keep diagnostic files
- C. Minimum size of diagnostic message including attachments
- D. Remove diagnostic files after a specified number of weeks

Answer: A

QUESTION 49:

Users that wish to utilize the Smart Upgrade feature to upgrade a full client installation must have what variable present on the client?

- A. InstallType=1
- B. InstallType=2
- C. InstallType=4
- D. InstallType=6

Answer: B

QUESTION 50:

Which policy contains the parameters for client Automatic Diagnostic Collection?

- A. Mail
- B. Desktop
- C. Security
- D. Archiving

Answer: B

QUESTION 51:

The condensed Directory Catalog is created from which template?

- A. dircat.ntf
- B. dircat5.ntf
- C. dircat7.ntf
- D. catalog.ntf

Answer: B

QUESTION 52:

When installing the Notes client, what documents are created by default that contain communication, Java applet security and port information?

- A. Account
- B. Location
- C. Connection
- D. Certificate

Answer: B

QUESTION 53:

Which of the following is required when setting up transactional logging on a server?

- A. Add TRANS_LOG=1 to the server's NOTES.INI file.
- B. Enable Transactional Logging in the server document.
- C. Create a Transactional Logging document in the Directory Catalog.
- D. Modify the NOTES.INI log settings to read LOG=LOG.NSF, TRANSLOG.NSF

Answer: B

QUESTION 54:

In which of the following databases does the Server Health Monitor store its health reports?

- A. shmon.nsf
- B. dommon.nsf
- C. statrep.nsf
- D. serverhm.nsf

Answer: B

QUESTION 55:

The Domino administrator has enabled auto-save for all users. Where are auto-save documents stored?

- A. To a user's local database
- B. To a user's mail database located on the server
- C. To an administrator defined server database per user
- D. To an administrator defined central repository database

Answer: A

QUESTION 56:

Which of the following does the Mail Policy define for a user?

- A. Define the ability to set the color scheme for the mail file
- B. Define the ability for a user to reserve a room in calendaring
- C. Define the ability for a user to modify their Internet password
- D. Define the ability for a user to issue delegation to their mail file

Answer: D

QUESTION 57:

Kathy, the Domino administrator, has created a new message disclaimer in a policy and wishes to push that to the clients. What command can Kathy utilize to force the process?

- A. tell server process disclaimer
- B. tell server process nmdisclaim
- C. tell adminp process mailpolicy

D. tell adminp process disclaimer

Answer: C

QUESTION 58:

A user wishes to utilize the new Calendar Cleanup functionality in the Notes client. What are the possible options when configuring the tool?

- A. "Delete entries that occurred after" and "Remove entries older than"
- B. "Mark entries that occurred over" and "Move to trash entries that occurred after"
- C. "Remove entries entered after" and "Mark entries for deletion that occurred over"
- D. "Delete entries that occurred over" and "Delete entries that occurred before"

Answer: D

QUESTION 59:

Administrators may now control access to which of the following components for Domino Web Access (DWA) in the server configuration document?

- A. Password quality, message indicators, and chat
- B. Offline meetings, offline synchronization, and archiving
- C. Calendar delegation, rich text, and the ability to save mail
- D. Rooms and Resources, online meetings, and attachments

Answer: D

QUESTION 60:

Cindy, the Domino administrator, is having issues with numerous mail rules acting sequentially on a message. What should she do to interrupt the mail rules from being processed?

- A. Create a 'stop processing' action in the rules
- B. Issue a 'stop processing' command on the server console
- C. Issue a 'stop processing' command on the server through a program document
- D. Create an agent in mail.box to stop all rule processing after a certain time

Answer: A

QUESTION 61:

Xavier has recently created a security policy that forces the user to change their Notes password the first time they use the client. However, existing users are not being forced to do so. What is the cause of this?

- A. The policy was not assigned during registration
- B. The user has already changed their Notes password
- C. The policy does not have a forced password length

D. The user has logged in from the web via HTTP first

Answer: A

QUESTION 62:

By entering the server console command "show schedule -DDM", what result is displayed?

- A. Programs scheduled to run
- B. Agents scheduled to run next
- C. Probes scheduled to run next
- D. The next scheduled replication time and the replication type

Answer: C

QUESTION 63:

The default period for a user rename request to remain active is how many days?

- A. 14 days
- B. 21 days
- C. 30 days
- D. 60 days

Answer: B

QUESTION 64:

Custom password policies will support which of the following with Notes id files?

- A. Random password generation
- B. Ids protected with Smartcards
- C. Forcing unique characters
- D. Ids protected with multiple passwords

Answer: C

QUESTION 65:

Vince, an end user, has noticed that his room reservation still has an hourglass icon next to it in the resources.nsf database. What is a likely cause of seeing this icon?

- A. The request for the reservation has been accepted
- B. The request for the reservation has been declined
- C. The request for the reservation is pending system approval
- D. The request for the reservation needs the resources owner approval

Answer: C

QUESTION 66:

Brittany, an end user, has set certain open documents to open when she relaunches the Notes client by using the menu item File-Save Window State. Where is this information stored?

- A. The AutoOpen folder within Bookmarks on the local machine
- B. The LastState folder within More Bookmarks on the local machine
- C. In the database autosave_xx.nsf on the local machine where xx is the user initials
- D. In the notes.ini on the local machine as the variable LastWindowsState=xxx where xxx is the unique id for each window

Answer: B

QUESTION 67:

Troy, a Notes user, wishes to close all the open tabs on his workspace before exiting the client. Which of the following is the step he will take to perform this?

- A. File - Close - Open Windows
- B. Action - Windows - Close All
- C. File - Close All Open Window Tabs
- D. View - All - Close Current Open Windows

Answer: C

QUESTION 68:

In order for you to find what groups a specific person belongs to, you must do which of the following?

- A. Create a program document for the server task Groupfinder
- B. From the Actions menu select 'Find user' in the Groups view
- C. From the Action bar select 'Find group member' in the Groups view
- D. Enable the manual agent that searches the person documents for group names

Answer: C

QUESTION 69:

DaJuan, the Domino administrator, has made changes to the TCPIP port setting on the server to enable encryption. What server console command must he run to have the changes take effect immediately?

- A. Port TCPIP -reset
- B. Restart port TCPIP
- C. Encrypt port TCPIP
- D. Port TCPIP -encrypt

Answer: B

QUESTION 70:

Which one of the following best describes the client version reporting feature?

- A. When a client connects to a server, the Lotus Notes version only is added to the Person document in the Domino Directory.
- B. When a client connects to a server, the Lotus Notes version only is added to the version control document in the log file.
- C. When a client connects to a server, the Lotus Notes version and operating system platform machine name are added to the Person document in the log file.
- D. When a client connects to a server, the Lotus Notes version and operating system platform machine name are added to the Person document in the Domino Directory.

Answer: D

QUESTION 71:

Tim, an end user, has launched his Notes client after it crashed and AutoSave has notified him that documents are available for recovery. If a document Tim is attempting to recover has already been modified on the server, which action will the Notes client perform?

- A. Tim is given the option to overwrite or create a new document
- B. Tim will manually have to compare the documents and enter the information
- C. Notes will automatically merge the AutoSave changes with the recent server changes
- D. Notes will automatically update the document with no user prompt since AutoSave is enabled

Answer: A

QUESTION 72:

You are creating a policy document in the Domino Name and Address Book. Which one of the following best describes the policy setting documents you can define within the policy document?

- A. Registration, Setup, Archiving, Desktop, Security
- B. Registration, Setup, Archiving, Desktop, Groups
- C. Registration, Setup, User ID, Welcome Page, Security
- D. Registration, Mail, Archiving, Welcome Page, Security

Answer: A

QUESTION 73:

Kendall has been running Activity Trends for a month now. Where would he look to see which databases a particular user has been accessing?

- A. From the Domino Administrator client, select Server > Ports > Database Usage
- B. From the Notes client open the ActTrend.nsf database and navigate to the User view
- C. From the Notes client open the Domino Directory, select the People view > Actions > Database Usage
- D. From the Domino Administrator client, select Server > Performance > Activity Trends > Latest Folder - User

Answer: D

QUESTION 74:

What step is required before creating a resources document?

- A. A mail document
- B. A site document
- C. A mail-in database for the resources
- D. A hub server running the RnRMgr task

Answer: B

QUESTION 75:

Which of the following Notes client tasks automates the deployment of policies to the users?

- A. ndyncfg
- B. nupdate
- C. nplcyupd
- D. ncfgclient

Answer: A

QUESTION 76:

DaJuan wishes to review the status of all the successful Smart Upgrades performed but finds that some of the reports are missing. What is the cause of these missing reports?

- A. Successful Smart Upgrades do not generate reports
- B. Smart Upgrades have no reporting associated with them
- C. He is not currently looking at the reports in the archive view
- D. He waited to view reports outside of the number of days to keep reports

Answer: D

QUESTION 77:

Which policy allows the administrator to configure lock-down settings per field?

- A. Mail policy settings document

- B. Desktop policy settings document
- C. Archive policy settings document
- D. Registration policy settings document

Answer: A

QUESTION 78:

Alan, the Domino administrator, has been directed to restrict users from using repeating characters in their user password. What step(s) must he perform?

- A. Create new id files for those users that need to be restricted
- B. Recertify the id files of those users that need to be restricted
- C. Create a custom password policy and assign it to the proper users
- D. Create a special certifier that contains the necessary restrictions in its password

Answer: C

QUESTION 79:

Each SSL server certificate is required to contain which of the following?

- A. The size of the private key
- B. The directory that contains the key ring file
- C. The names of servers authorized to access the server
- D. The distinguished name of the CA that signed the certificate

Answer: D

QUESTION 80:

As the administrator you are able to update workstation ECL's automatically by changes made to the Administration ECL. You would like to change the settings for each individual person and what access they have to run certain types of actions on their machine. To accomplish this, you must perform which of the following?

- A. Place <ECLOwner> in the Administration ECL with the new rights
- B. Place <UserName> in the Administration ECL with the new rights
- C. Enter -All Users- in the Administration ECL with the new rights
- D. Enter each individual user name in the Administration ECL with the new rights

Answer: A

QUESTION 81:

Sang uses the Administration Process (AdminP) to move a user's mail file to a different mail server. What must Sang do in order for the new mail file to be created and the old mail file to be deleted?

- A. Update the user's location documents

- B. Modify the mailserver field in the user's person document
- C. Give the user rights to create new databases on the new mail server
- D. Approve the deletion of the old mail file in the ADMIN4.NSF database

Answer: D

QUESTION 82:

Which of the following is the name of the process in which you periodically force the update of new public and private keys stored in server id files?

- A. Key update
- B. Key rollover
- C. Applied keyfile
- D. Forced recertification

Answer: B

QUESTION 83:

A CRL is defined as?

- A. A cluster redundancy list for web server scaling
- B. A list of common resources used by the web server
- C. A cluster redirection list for web server scaling
- D. A time-stamped list identifying revoked Internet certificates

Answer: D

QUESTION 84:

When your environment was established, password recovery was not configured. You have implemented this in the current organizational unit certifier and recertified your users. How will the recovery information be applied to the user id files?

- A. By mailing the users a button that must be clicked
- B. Automatically when they authenticate with their home server
- C. They must enable Import Certificates in File > Preferences > User Preferences
- D. They must select File > Security > User Security and import the new information into their id file

Answer: B

QUESTION 85:

What is the recommended number of Recovery Authorities for a certifier?

- A. One
- B. None
- C. More than one

D. This option is not configurable

Answer: C

QUESTION 86:

The Domino administrator wishes to use Certificate Revocation Lists (CRL) for Internet certificate authentication. What is required to make this function correctly?

- A. The server must be running IIS
- B. The server must be running the CRL task
- C. The server must be using a Domino ICL database for certificates
- D. The server must be using a Domino server-based certification authority for issuing Internet certificates

Answer: D

QUESTION 87:

Maria, the Domino administrator, has installed a new user machine. When installed, the workstation created the Workstation ECL from what configuration setting?

- A. The Administration ECL
- B. The Lotus supplied defaults
- C. The ECL template located on the user's local machine
- D. The ECL.nsf database stored on the user's home server

Answer: A

QUESTION 88:

Barbara wishes to migrate her company's Notes certifier to the new Certificate Authority process. She has chosen to encrypt the certifier id with the server id. What Domino server console command must be issued next?

- A. load unlock ca <idfile>
- B. load ca <password> unlock
- C. tell ca activate <password>
- D. tell ca unlock <idfile><password>

Answer: C

QUESTION 89:

Nakia cross certified the Organizational Unit (OU) /NYC/ Certkiller with her organization's /BOX Organizational (O) certifier. Which of the following statements below are correct for this scenario?

- A. Users or servers with the /NYC/BOX certificate can access / Certkiller servers.
- B. Users with an Certkiller ID can access any of Box's servers that have a /NYC/BOX

certificate.

C. Any user or server ID with the /NYC/ Certkiller certificate can access any server in the /BOX organization if they have the appropriate cross certificate.

D. Servers with the /NYC/ Certkiller certificate can access any server in the /BOX organization if they have the appropriate cross certificate but no /NYC/ Certkiller users can access /BOX servers.

Answer: C

QUESTION 90:

You have established a required password change interval for users. One of your users, Nina, did not change her password, even through the grace period you specified. What steps must be done to allow her access to the server again?

A. You must enable the automatic option to extend the grace period for trusted users

B. You must manually delete the data in the Password digest field in the Person document and the user creates a new password

C. You must recover a copy of her id file from the encrypted ID Recovery database and send that to her for use to access the system

D. You must create a new id for the user with the same name and new password and have her replace the existing one on her machine to successfully access the server

Answer: B
